Projected Profit and Loss Statement

Business	GTT Center Perth
Document	Projected Profit and Loss, Year 1 and steady state
Prepared by	Theodore (CFO) for Anthony Zed
Date	2026-10-12
Status	DRAFT for review
Legal entity	TO CONFIRM
Currency	Australian dollars (A$). All figures GST-inclusive unless stated
Basis	3-Way Financial Model v0.4 (2026-10-11), demand-responsive rostering, headline rent A$8,000 per month

All figures are planning estimates. The venue is not yet open and no trading data exists.

---

1. Twelve-month projected P&L (Months 1 to 12)

Revenue ramps at 43%, 64%, 79% and 93% of steady state in Months 1 to 4, then 100% from Month 5 (model §3).

Figures in A$.

A$	M1	M2	M3	M4	M5	M6	M7	M8	M9	M10	M11	M12	Year 1

Year 1 summary: revenue A$1,543,729.29, total costs A$1,221,714.36, net operating profit A$322,014.93.

Line definitions and sources

Line	How it is built	Source
AM GTT packages	Average AM clients per day x A$250 x 26.33 trading days	Model §3; repo CURRENT-STATE §5
PM services	10 sessions per day at steady state, about 210 transactions per month at A$117 average, ramped	Model §3; repo PM capacity model
Ancillary	A$0. Excluded from the baseline by founder decision (2026-07-30)	Repo profit-loss-tables.md v3.0

Line	How it is built	Source
Lab fee	A$0. The repo assumes the pathology lab bulk-bills Medicare. Tender fees are not yet confirmed	Model §10
GTT supplies / consumables	A$400 + A$800 per month, flat	Model §3
Variable labour	Phlebotomist and AM therapist wages rostered to each morning's bookings, plus super 12% and workers compensation 1.7%	Model §1A, §3a
Fixed labour	PM wages A$12,704.74 + Venue Manager A$7,040.00 = A$19,744.74, plus on-costs = A$22,449.77	Model §3a, §6a
Rent	A$8,000 per month (headline, per Anthony's instruction)	Model §3, §9
Other fixed overhead	Utilities, insurance, laundry, marketing, software, cleaning, accounting, miscellaneous. Rises with the marketing ramp (A$600 / 800 / 1,000 / 1,200, then A$1,500)	Model §3, §3c

Note: the model reports payroll as one line. The split into variable and fixed labour uses the model's own fixed-labour figure (A$22,449.77, which ties exactly to model §6a fixed costs of A$36,738.11 less rent, other overhead and cost of goods). Variable labour is total payroll less that figure. In Month 1, variable labour equals the model's one "2 phlebotomists + 4 therapists" roster every morning (A$42,255.18) exactly.

Not in model: income tax (entity undecided), depreciation, interest (no debt assumed).

---

2. Steady-state monthly P&L (Month 5 onward)

Anthony's brief asked for both "fixed overhead (rent ceiling A$10.5k)" and the "+A$35,186 baseline". **These do not go together: the +A$35,186.40 baseline uses A$8,000 rent, so both are shown below.**

A$ per month	Headline (A$8,000 rent)	Rent at A$10,500 gross ceiling	GST-stress (A$8,000 rent)
AM GTT packages	118,485.00	118,485.00	118,485.00
PM services	24,585.37	24,585.37	24,585.37
Ancillary	0.00	0.00	0.00
Total revenue	**143,070.37**	**143,070.37**	**143,070.37**
Lab fee	0.00	0.00	0.00
GTT supplies and consumables	1,200.00	1,200.00	1,200.00
Variable labour (rostered AM)	71,145.86	71,145.86	71,145.86

A$ per month	Headline (A$8,000 rent)	Rent at A$10,500 gross ceiling	GST-stress (A$8,000 rent)
Fixed labour (PM + Venue Manager)	22,449.77	22,449.77	22,449.77
Rent	8,000.00	10,500.00	8,000.00
Other fixed overhead	5,088.34	3,838.34	5,088.34
Total costs	**107,883.97**	**109,133.97**	**107,883.97**
Net operating profit (repo basis)	**35,186.40**	**33,936.40**	35,186.40
Less: GST on sales (revenue ÷ 11)	not applied	not applied	-13,006.40
Add: GST credits on costs	not applied	not applied	1,262.58
Net after GST			**23,442.58**
Reported figure	**+A$35,186.40**	**+A$33,936.40**	**+A$23,442.58**

Column notes: - **Headline:** the v3.0 committed model at 18 AM clients per day, locked by Anthony on 2026-10-10 (model §1, §12). - **Gross ceiling:** A$10,500 all-in per the commercial site brief v0.3. The model assumes utilities (A$650) and cleaning (A$600) sit inside the ceiling, so other overhead falls by A$1,250 (model §9). If they do not, the model's separate "rent-adjusted A$10,500" case gives +A$32,686.40. - **GST-stress:** assumes all sales are taxable at 10% and the A$250 package price includes GST (model §3d). At the gross ceiling the GST-stress figure is +A$22,306.21 (model §9).

---

3. Break-even working

Demand-responsive rostering basis (LOCKED by Anthony 2026-10-11)

Step	Working	Result
1. Fixed costs per month	Rent, other overhead, cost of goods, PM labour and Venue Manager with on-costs	A$36,738.11
2. Add one 2 + 4 roster every morning	2 phlebotomists + 4 therapists, with on-costs	+ A$42,255.18
3. Total costs at the low tier	A$36,738.11 + A$42,255.18	**A$78,993.29**
4. Less non-AM revenue	PM services held at full steady state	− A$24,585.37
5. Costs AM GTT must cover	A$78,993.29 − A$24,585.37	**A$54,407.92**
6. Revenue per daily AM client per month	A$250 x 26.33 trading days	**A$6,582.50**
7. Break-even	A$54,407.92 ÷ A$6,582.50	**8.266 AM clients per day**

8.266 is 45.9% of the 18-client capacity, a margin of safety of 9.734 clients per day. It matches the repo's own LOW-segment break-even (CURRENT-STATE §10). Under GST-stress the break-even is 9.255.

Comparison: fixed staffing (full 2 + 8 roster every morning)

Step	Working	Result
Steady-state total costs	Full roster every morning	A$107,883.97
Less non-AM revenue		− A$24,585.37
Costs AM GTT must cover		A$83,298.60
Break-even	A$83,298.60 ÷ A$6,582.50	**12.655 AM clients per day**

Source: repo CURRENT-STATE §10 and model §6a. Rostering to bookings lowers break-even by about 4.4 clients per day; it does not change steady-state profit, because at 18 clients every role is needed.

---

4. Notes

1. **45-minute cadence.** The 45-minute pair cadence for quiet mornings (10 or fewer bookings) was adopted by Anthony on 2026-10-11. Full mornings (15+ weekday, 17+ Saturday) keep the 25-minute cadence. Only the 25-minute cadence reaches 18 clients per day and the +A$35,186.40 steady state.
2. **Fill rate.** Fill of rostered slots is assumed to be 100%. At 85% fill, steady-state net is about +A$17.4k per month (A$17,413.65 repo basis). At 70% fill the business makes a loss (model §13).
3. **GST.** GST treatment is general information only and must be confirmed with the accountant. The repo P&L is GST-inclusive with no line for GST paid; the GST-stress column shows the downside.
4. **Lab fee.** The repo assumes A$0 to GTT. Each A$10 per client would cost about A$4,739 per month at capacity (model §10). Tender fees are TO CONFIRM.
5. **Rent.** A$8,000 is the headline per Anthony's instruction. The real search budget is A$9,500 to A$10,500 per month (model §9).
6. **Award rates.** Wage rates are the repo's award casual rates (1 July 2026). Verify with Fair Work before acting.
7. **Not in model:** income tax, depreciation, interest, rent during fit-out, early-release staffing upside.

Arithmetic check: every row and column above was re-summed by script and agrees to the cent with model v0.4 §3, §3a, §3d, §6a and §9.
