Status at a glance

AREA	STATUS	DETAIL
Naming	CONDITIONAL	SOLENA (71.6%, conditional leader) vs ELOWEN (68.8%) — both live, neither locked. Trademark clearance deliberately deferred.
Pathology partner (WDP)	PENDING	Active dialogue with Carole Rivers (WDP) — no signed agreement. Commercial rental figure still outstanding.
Venue	SHORTLISTED	2 Tier-1 candidates identified (Osborne Park through Cockburn/Cannington), neither inspected, nothing secured.
Financial model	CURRENT	Table 1 (18/day) is the planning target; Table 2 (12/day) is the downside/sensitivity reference only.
Wage/award research	RESEARCHED, NOT PROPAGATED	Current award rates researched 2026-08-16; not yet flowed through the full payroll recompute. See Ch 9.
Brand identity	LOCKED	7-colour palette, Fraunces + DM Sans typography, wordmark-led logo direction — see Ch 2.
Startup cost	PLANNING FIGURE, NOT FINAL	A\$251,198 adopted "in principle" — pending venue confirmation and real supplier quotes.
Insurance	QUOTE REQUEST DRAFTED	Not yet sent — see Ch 12.
Accountant/solicitor	OUTREACH DRAFTED	Not yet sent.

Founder decisions required (one sentence each)

- Ask Carole (WDP) directly: will WDP supply the phlebotomist under a rental model, or does GTT Center Perth keep hiring in-house?
- Engage a trademark attorney now, or continue deferring? (Plain-terms treatment exists — no default answer assumed.)

- Final brand name — hold until trademark clearance timing is decided.
- When (if ever) should package prices increase from A\$250 / A\$300?

Waiting on third parties

- **WDP** — commercial rental figure (actively progressing via WDP's State Business Manager).
- **PathWest / Clinipath** — both emailed 2026-07-27, awaiting reply (contingency only).
- **Medical waste disposal** — a WDP question, not being researched independently.

Grace/AI actions currently underway or completed

This dossier itself; the real-Perth service catalogue; itemised purchase list; Asia-sourcing and café-service investigations; current wage/award/insurance research; the full business-plan and financial-model documentation refresh (2026-08-16 round).

Genuinely unresolved items (do not present as settled)

- MA000027 Saturday phlebotomist ordinary-hours carve-out — could reduce Saturday labour cost, not yet confirmed with Fair Work.
- Full payroll recompute against the newly-researched 2026-08-16 wage rates — not yet run.
- Exact WorkCover WA premium rate for this venture's classification — planning estimate only.
- AM→PM conversion rate — genuinely unknowable pre-operational, not modelled as fact anywhere in this document.

Canonical sources this entire document defers to

- docs/CURRENT-STATE.md — package prices, capacity, headcount, P&L.
- data/models/master_financial_model.yml — machine-readable financial model.
- docs/naming/NAMING-DECISION-STATE.md — naming status.
- docs/VERIFICATION-TRACKER.md — every unresolved item and who can confirm it.

The Business Idea

What it is

GTT Center Perth is a concept for Western Australia's first premium wellness venue built around the Glucose Tolerance Test (GTT) — a mandatory ~2.5-hour pregnancy screening test. Instead of a bare pathology waiting room while fasting, a woman spends the mandatory test window receiving massage, nails, hair, or beauty treatment, in a space designed to feel like a private house, not a clinic.

The problem

Every pregnant woman in WA undergoes a GTT at 24–28 weeks' gestation — an estimated **~33,570 WA women per year** **VERIFIED** (KPMG analysis of ABS Births, Australia 2024). The test itself is unavoidable: a fasting draw, a 75g glucose drink, then further draws at approximately 1 and 2 hours later — roughly 2–2.5 hours total, most of it spent waiting. Today, that wait happens in a standard pathology collection centre: fluorescent lighting, a plastic chair, no scheduled itinerary, nothing to do. It is a mandatory clinical requirement delivered with zero attention to the experience of the person enduring it.

The customer

Two distinct customers, sharing one venue:

- **AM/GTT (referred):** a pregnant woman, 24–28 weeks, referred by her midwife or OB. She didn't choose this appointment — fasting, at least somewhat anxious about the needle, arriving braced for a fluorescent-lit waiting room.
- **PM/standalone (self-booked):** any woman booking massage, nails, hair, or brows for herself — pregnant or not, GTT client or not — the same way she'd book at any premium day spa.

Why the current experience is inadequate

No dedicated wellness-integrated GTT venue has been found operating in WA. The only two directly comparable businesses found anywhere in Australia are MIWM (Melbourne, single-client-at-a-time, reported fully booked 3–4 weeks in advance) and The GTT Lounge (Sydney, smaller and less premium). Standard pathology collection centres deliver the clinical component only, with no wait-time management or wellness integration at all.

The solution

A purpose-built venue where GTT blood draws happen on-site (performed by employed phlebotomists, under a pathology partner's accreditation umbrella — GTT Center Perth does not

diagnose or hold its own accreditation), the wait between draws is filled with wellness services, and the afternoon operates as a fully standalone pregnancy-and-beyond wellness venue with no GTT requirement at all.

Differentiation

How GTT Center Perth differs from the only known comparables

COMPARATOR	MODEL	HOW GTT CENTER PERTH DIFFERS
MIWM (Melbourne)	Single-client-at-a-time	Multi-client concurrent model — 18 clients/day planning target on 2 chairs, not 1-at-a-time
The GTT Lounge (Sydney)	Smaller, described as less premium	Full hairdressing menu, purpose-designed premium interior, no direct WA competitor identified
Standard pathology centres	Clinical only, no wait-time management	The entire proposition — this is the gap being filled

Premium justification

The AM packages (A\$250 / A\$300) sit above what an individually-booked equivalent (a comparable 30–45min massage plus a comparable nail or beauty service) would cost separately at real, currently-trading Perth businesses researched for this venture — see Chapter 4. The premium is justified by: venue/lounge access bundled free, zero separate-booking friction, a clinical requirement transformed into a scheduled, hosted experience, and a considered arrival-to-departure journey (Chapter 3) rather than a menu of discrete transactions.

GTT's role in the wider proposition

The GTT is the anchor that brings a woman through the door on a day she didn't choose to come in — but it is not the whole business. The standalone PM wellness venue, open to any woman regardless of pregnancy or GTT status, is designed to be commercially uncapped by the GTT referral pipeline, and the return-loop mechanism (Chapter 3) is built specifically to convert one-off AM visitors into self-directed, repeat PM customers.

SOURCE & VERIFICATION

- docs/CURRENT-STATE.md §3 (market sizing)

Brand & Positioning

NAMING STATUS — DO NOT REOPEN

Naming is narrowed to two live finalists, both accurately presented below. Neither is locked. Trademark clearance for both is deliberately deferred to a later funding milestone.

Naming

Naming Final Comparison — weighted three-way scoring

CANDIDATE	SCORE	STATUS	STRONGEST ON	KNOWN CONFLICT
SOLENA	71.6%	Conditional leader	Repeat-visit desirability, execution cost, non-pregnancy lifestyle fit	Live registered AU trade mark, Class 3 (cosmetics) — services-use (Class 44) question genuinely open
ELOWEN	68.8%	Second, fully live	Clinical credibility, multi-venue scalability	Unregistered business-name overlap (Elowen Counselling, Eaton WA)
ELOWYN	65.9%	Evaluated, not being pursued further	Cleanest trademark position of the three	Severe referral/spelling friction — a structural weakness, not fixable by design

PENDING PROFESSIONAL REVIEW

Legal status for all three candidates is **KNOWN RISK — NOT YET PROFESSIONALLY CLEARED**. See the plain-terms trademark-attorney treatment (source block below) for what's genuinely certain vs uncertain, and whether an attorney is actually necessary at this stage.

Positioning

Premium, not luxury — restraint executed without compromise, not exclusivity signalling. A woman paying the entry-level price must still feel she belongs. What actually creates premium perception, independently confirmed by design exploration: restraint over decoration, natural/warm light, one or two consistently-executed material choices rather than many mediocre ones, unhurried pacing, and the total absence of clinical signalling outside the one room that genuinely needs it (the Blood Collection Room).

Personality & register

Calm → intelligent → warm → reassuring → sophisticated → quietly luxurious. Complete sentences, plain English, active voice. No clinical jargon ("patient," "reference number," "results") in customer-facing copy.

Locked palette

 Warm Ivory #FAF6EE — dominant background	 Warm Stone #E8DAC5 — secondary surface	 Deep Brown #33261E — primary dark/text	 Earthy Terracotta #A9654E — supporting accent	 Muted Olive #5E5F45 — supporting accent
 Soft Dusty Rose #D9A08C — restrained accent, 1-2 moments only	 Warm Brass #9C7A46 — fine- line/signage detail only, never dominant			

LOCKED, 2026-08-15/16 — DO NOT REOPEN

This is the exact 7-colour system used throughout this document. WCAG contrast-audited: CTA buttons use Deep Brown fill + Warm Ivory text (13.56:1), not Terracotta fill (fails AA at ~3.2-4.2:1).

Typography

Fraunces (display/headings — the typeface used throughout this document's own headings) paired with **DM Sans** (body/UI — this document's own body text). Wordmark-led logo direction, no additional symbol locked.

What's locked vs. open

LOCKED	STILL OPEN
7-colour palette, exact hex values	Final brand name
Typography (Fraunces + DM Sans)	Final logo/wordmark execution for the winning name
Wordmark-led logo direction (no additional symbol)	Trademark clearance timing
Brand voice/register	Production signage, packaging, uniforms — all explicitly deferred

- `docs/strategy/PREMIUM-POSITIONING.md`

Customer & Market

Target customer

AM (primary, referred): a woman 24–28 weeks pregnant, referred for a GTT by her midwife or OB — she didn't choose the appointment. PM (primary, self-booked): any woman booking massage, nails, brows, or hair for herself, pregnant or not.

Customer journey — before, arrival, GTT, after

The single highest-leverage moments, per the full 15-stage journey map: the welcome/itinerary card at arrival (her personal timetable, assigned staff, food/drink choice, and a Google review link — a genuine, low-cost addition), and the leaving-moment gesture — a considered small parcel with a warm item to eat immediately (she's just come off a multi-hour fast) handed over at the exact point her final draw is complete. Not related to test results in any way — she never receives results at the venue; those go to her referring doctor.

The return loop — AM to PM retention

The venture's own highest-priority strategic mechanism: Visit 1 (GTT, referred) → Experience (unexpectedly premium) → Discovery (she learns the PM business exists) → Follow-up (a genuinely useful message, not a marketing blast) → Visit 2 (self-chosen) → Relationship (staff continuity) → Advocacy. STRUCTURALLY UNKNOWNABLE PRE-OPENING The conversion rate this loop actually achieves cannot be known or modelled before the venue is trading — a data-capture specification exists so this becomes measurable once trading starts, not before.

Referral mechanism

AM slots are filled entirely by clinical referral — midwife/OB practices. PM demand is generated through word of mouth (the stated primary channel) plus an aggressive marketing push during fit-out, run in parallel with referral partnerships, not sequenced after them.

Competitive positioning & market opportunity

WA births/year

~33,570

KPMG analysis of ABS Births, Australia 2024

VERIFIED

Perth metro GTT tests/week

~515

Derived from ~26,790 Perth metro births/year ÷ 52

Share at planning capacity

~21%

108 slots/week (18/day × 6 days) ÷ ~515/week

Demand-validation & waitlist strategy

TARGET, NOT YET ACHIEVED The current, revised pre-lease waitlist target is **500–700 signups** before opening — tested directly against Month 1's actual volume requirement under the 18-client planning model (the previous "300+" reference was found insufficient once tested and is no longer used). A 6-factor, 100-point signup quality-scoring framework exists (due-date/GTT-window timing alignment weighted highest) — **DESIGNED, NOT YET LIVE** the public-ready landing page exists in this repo but has not been deployed publicly; no real signups have been collected yet.

Validated vs. assumed — stated plainly

VALIDATED (REAL, SOURCED)	ASSUMED (PLANNING ESTIMATE, NO REAL DATA)
Market size (WA/Perth births, ABS/KPMG-sourced)	Referral pipeline will actually fill 18 daily slots
Scheduling feasibility (solver-verified, zero collisions)	PM average transaction value (~A\$95/session)
Real Perth comparable service pricing (Chapter 4)	AM→PM conversion rate (structurally unknowable pre-opening)
WDP's own stated start-time/cutoff guidance (written correspondence)	Waitlist-to-booking conversion rate

Services, Menu & Pricing

AM packages — confirmed, locked pricing

PACKAGE	COMPOSITION	DURATION	PRICE
AM Package 1	Fixed 2×30-min services (Massage/Nails/Hair/Beauty)	60min window	A\$250 LOCKED
AM Package 2	Client's choice: 2×45min, or 1×45+1×30min, or 2×30min	60-90min window	A\$300 LOCKED
AM gap-fill slots	Any a-la-carte service ≤30min, in a genuine staff gap	Variable	Per a-la-carte CONDITIONAL, ADVANCE- BOOKING ONLY

Venue/lounge access is bundled free with either package. Financial models use A\$250 (Package 1) for every AM revenue calculation — a deliberate conservative safety margin, not a blended average.

PM services

OFFER	PRICE	STATUS
Individual a-la-carte (any single service below)	~A\$95 average PLANNING ESTIMATE	No real booking data yet
Set/fixed PM packages (e.g. "PM Refresh")	Not yet signed off	PENDING FOUNDER SIGN-OFF

Full a-la-carte catalogue

Grounded in real Perth market research, 2026-08-16 — 6 named, currently-trading comparable businesses

SERVICE	CATEGORY	DURATION	PLANNING PRICE	AM GAP-FILL?	PM?
Pregnancy massage	Massage	30/45min	~A\$95 / A\$130	Yes	Yes
Relaxation massage	Massage	30/45min	~A\$95 / A\$130	Yes	Yes
Gel manicure	Nails	30/45min	~A\$65-80	Yes	Yes
Gel pedicure	Nails	45min	~A\$75-90	Limited	Yes
Cut, shampoo, blow-dry	Hair	30/45min	~A\$85-105	Yes (30min)	Yes
Blow-dry/styling only	Hair	30min	~A\$60-80	Yes	Yes
Brow shape/tint	Beauty	20-30min	~A\$35-45	Yes	Yes
Facial (mini/express)	Beauty	30min	~A\$75-90	Yes	Yes
Facial (deluxe/full)	Beauty	45-60min	~A\$95-140	No	Yes
Lash lift/tint	Beauty	30-45min	~A\$65-110	Limited	Yes

Every planning price above sits close to, but slightly above, the real advertised Perth comparable range found this pass (JTs Hairstylists, Le Beau Day Spa, The Library Nail Salon, The Beauty and Brow Parlour, and others) — consistent with genuine premium positioning, not an outlier or a mispriced package.

Retail categories — established, not yet expanded

BRAND	REAL JUSTIFICATION	WHOLESALE ACCESS
GAIA Skin Naturals	Australian-made, pregnancy/baby-specific	CONFIRMED dedicated wholesale program found
Weleda	Long-established, widely distributed in Australia	Real, not independently re-verified to the same depth
Mustela	Widely recognised globally, strong maternity presence	Real, not independently re-verified to the same depth

Third-party resale only — **SETTLED, FOUNDER-CONFIRMED 2026-08-14** a name-branded cosmetics/retail product line is explicitly not a strategic priority. A separate, genuinely distinct idea — a branded practical maternity-aid line (TENS machines, birth balls, etc.) — remains a parked future opportunity only.

SOURCE & VERIFICATION

- docs/CURRENT-STATE.md §2

Customer Timetable & Operating Model

AM timetable — Table 1 (18/day, the planning target)

TABLE 1 VS TABLE 2 — DAILY STRUCTURE

PARAMETER	TABLE 1 — PLANNING TARGET	TABLE 2 — DOWNSIDE/SENSITIVITY ONLY
Clients/day	18	12
Start time	07:00	08:00
Pair cadence	25 minutes, uniform	25 minutes, uniform
Last Draw 1	10:20 (inside WDP's ~10:30 guidance, real margin)	10:05
Chairs / phlebotomists	2 / 2	2 / 2
Treatment headcount	8 dual-qualified	8 dual-qualified — identical

SOLVER-VERIFIED Both models verified via two independent scheduling methods (sweep-line peak concurrency and greedy first-fit assignment), which agreed exactly — zero double-bookings at either volume.

Treatment headcount & room utilisation

Massage+Beauty pool

4

Shared pool, peak-concurrency-driven

Nail stations

2 staffed/₄ physical

Extra stations = rostering flexibility, not extra hires

Hair chairs

2 staffed/₄ physical

Same principle

Phlebotomists

2

1 per chair, credentialed under the pathology partner

Operating hours & AM/PM handover

Trading Monday–Saturday; Sunday closed until standalone PM demand is proven and profitable enough to justify the added penalty-rate cost — a reviewable business choice, not a legal requirement (WA Retail Trading Hours Act exempts this business type).

Staff coverage — reception & Venue Manager, modelled not assumed

MODELLLED, 2026–08–16 The full 07:00–18:00 trading window (11 hours) exceeds any single sustainable shift — one Venue Manager cannot personally cover reception across the entire day. Two structurally sound alternatives exist (VM covers AM, a lighter-hours role covers PM; or the existing two-role model continues with the Receptionist's hours extended to cover PM) — neither committed here, both requiring real PM booking-volume data to size correctly.

Downtime-fill & early-release policy

POOL	TABLE 1	TABLE 2	POLICY
Between-client gaps (revenue)	A\$3,622.67/mo	A\$2,264.17/mo	Sellable — advance online booking only
Lead-in/tail (cost saving)	A\$14,167.19/mo	A\$18,495.99/mo	Not sellable — early release instead

Neither figure is included in the headline Net P&L (Chapter 10) — both are separate, tagged, disclosed upside lines.

CONDITIONAL / POTENTIAL, NOT GUARANTEED

SOURCE & VERIFICATION

- docs/CURRENT-STATE.md §1, §4, §8
- docs/scenario-c-sync-timetables.md §0.6a — full solver-verified timetables
- docs/staff-plan.md — A8, VM/reception coverage modelling

Venue Requirements

Room schedule — 239sqm day-one footprint

ROOM	AREA	TYPE	NOTES
Blood Collection Room	18sqm	Solid walls	The only genuinely clinical space — the sole room requiring privacy-critical solid enclosure
GTT Lounge	35sqm	Open plan	Client wait/wellness lounge
Reception	15sqm	Open plan	
Cafe/Refreshments Counter	8sqm	Solid walls	Glucose-drink dispensing is a protocol requirement, not an amenity
Treatment rooms ×4 (Massage/Facial-Beauty)	12/12/11/11sqm	Curtain-partitioned	Not walled — a cost-saving, solver-consistent design choice
Nail Area (4 stations)	32sqm	Open plan	Mandatory LEV extraction
Hairdressing Area (4 chairs)	52-56sqm	Open plan	
Staff Room, WCs, Linen/Storage, Circulation	~47sqm combined	Mixed	Circulation min. 1.5m wide for prams/mobility aids

GOVERNING DESIGN RULE

The Blood Collection Room is the only space permitted to look clinical — every other space should read as a private house.

Customer flow, parking, accessibility

Ground-floor preferred, 8-10+ dedicated parking spaces, existing plumbing/3-phase power strongly preferred. Accessible WC (7sqm) plus standard WC (4sqm), circulation designed for prams and mobility aids throughout.

Compliance considerations feeding fit-out

- WorkSafe WA-compliant Local Exhaust Ventilation (LEV) for the nail station — a real, disclosed tension with the open-plan adjacency to the Lounge, not yet resolved with a WorkSafe-familiar contractor.
- AS 1530.2/AS 1530.3 fire-retardant curtain fabric for the treatment-room partitions — real Australian suppliers combining fire-retardancy and acoustic performance identified (Imported Theatre Fabrics, Freedom's Halcyon range, and others).
- WA Skin Penetration Code compliance for the Blood Collection Room specifically.

Property search status

ACCURATE STATUS LABELLING — DO NOT OVERSTATE

SHORTLISTED Two Tier-1 candidates identified. **Neither inspected. Nothing secured.**

Anthony's own ongoing search, metro Perth, Osborne Park through Cockburn/Cannington — the single highest-leverage unblock in the whole venture (blocks Venue Manager recruitment, fit-out, hiring, council permits).

Startup Costs & Procurement

Scenario summary — TOTAL level

Lean (Minimum Viable Opening)

A\$243,912

Deferred/reduced items, all compliance protected

Recommended — adopted planning figure

A\$251,198

FOUNDER-APPROVED "IN PRINCIPLE," NOT FINAL

Expected / Full Build

A\$450,494 / A\$644,832

Realistic mid-point / fully-specified high end

PENDING VENUE CONFIRMATION

All three scenarios are planning estimates. The recommended A\$251,198 figure requires a confirmed venue and real supplier/builder quotes before it can be treated as final.

Category breakdown — recommended figure, drillable to item level below

A\$251,198 Pre-Opening Capital, by category

CATEGORY	AMOUNT	ESSENTIAL/OPTIONAL
Premises acquisition (bond, advance rent, legal)	A\$19,000	Essential
Design and approvals	A\$4,100	Essential (compliance)
Fit-out (construction)	A\$139,678	Essential
Furniture, fixtures and fittings	A\$14,160	Essential
Equipment (day-one)	A\$19,280	Essential
Opening inventory and consumables	A\$2,585	Essential
Technology and systems	A\$820	Essential (core only)
Staffing before opening	A\$22,872	Essential
Marketing and launch	A\$1,250	Essential (near-zero, referral-led)
Professional services	A\$539	Essential
Subtotal	A\$224,284	
Contingency (12%)	A\$26,914	
TOTAL	A\$251,198	

STARTUP CAPITAL BY CATEGORY — VISUAL BREAKDOWN

Itemised purchase list — CATEGORY → ITEM

Real brand/supplier/GST/confidence detail for every purchasable item. Trades/structural items (construction, LEV installation) remain ballpark — real Perth builder quotes require a confirmed venue.

Nail Station (4 stations, day-one committed)

ITEM	BRAND/SUPPLIER	QTY	UNIT PRICE	TOTAL	CONFIDENCE
Nail table with dust collector	Diamond Nail Supplies / National Salon Supplies	4	A\$500–800	A\$2,000–3,200	MEDIUM
LEV unit (shared, WorkSafe compliant)	Local extraction contractor — not yet identified	1	A\$1,500–4,000	A\$1,500–4,000	LOW
Pedicure spa chair (pipeless)	American Beauty Supply / Salon Supply Australia	4	A\$800–2,000	A\$3,200–8,000	MEDIUM
UV/LED lamp, manicure chair, trolley, opening stock	Diamond Nail Supplies / National Salon Supplies	—	—	A\$2,640–4,880	MEDIUM

Massage Rooms (2) • Hair Station (4 chairs, 2 backwash) • Beauty/Brows (2 rooms)

CATEGORY	SUBTOTAL	KEY ITEMS
Massage Rooms	A\$2,925–7,400	Pregnancy massage tables (National Salon Supplies), linen, aromatherapy
Hair Station	A\$6,750–15,350	Styling chairs, backwash basins (Salon Supply Australia), named-brand dryers/irons
Beauty/Brows Station	A\$2,800–7,190	Treatment beds (American Beauty Supply), wax heater, brow/lash kit
Lounge & Common Areas	A\$8,620–19,850	LOW CONFIDENCE — NEEDS IN-PERSON TESTING BEFORE BULK PURCHASE
Technology	A\$3,240–7,920	iPads, POS (Square/Tyro), Fresha subscription
Emergency/safety (AED, first aid)	—	PROTECTED — NO REDUCTION

Landlord contribution — not guaranteed, not counted

FOUNDER VIEW

A\$20,000–60,000 potential landlord fit-out contribution is **not included in any total above**. A rent-free fit-out period is a more realistic possibility than a cash contribution — also not guaranteed. Both remain real, disclosed upside to negotiate once a specific property is chosen, not baked into any funding conversation.

Deferred to Months 3-6, funded from early revenue (~A\$13,000-14,000)

Additional 2 nail stations, additional 2 hair chairs, remaining acoustic treatment, full website build, professional photography, 3rd iPad + colour printer.

Construction cost basis

INTERNALLY-GENERATED, NOT EXTERNALLY BENCHMARKED

The A\$800–1,250/sqm rate is this repo's own established figure, not sourced to a real Perth builder or published cost guide. It is plausibly still conservative (higher than a real open-plan build) since the electrical/HVAC flow-on saving from the curtain-partition design was identified but never separately quantified.

Staffing & Rosters

Organisational structure

Headcount & positions

ROLE	QTY	COVERAGE	WAGE STATUS
Venue Manager	1	Operations, staff management, WDP liaison, incident response — critical-path hire	CRITICAL-PATH, GATED ON VENUE
Phlebotomist	2	AM only, Chair A/B, credentialed under the pathology partner	ESTIMATE, AWARD-DEPENDENT
Treatment staff (Massage+Beauty pool, Nails, Hair)	8	One common pool , rostered AM or PM interchangeably — role doesn't change by shift	ESTIMATE, AWARD-DEPENDENT
Receptionist/Coordinator	1	Split shift, AM-weighted; PM coverage gap identified, not yet resolved	ESTIMATE
Relief/backup pool	Budget line	Sick/holiday cover without reducing same-day capacity	ESTIMATE

Phlebotomist coverage

POTENTIAL/CONDITIONAL

Consider ~3–4 phlebotomists on the books (not all rostered every day) so one can be absent without compromising operations, under the "only pay for actual rostered/worked hours" principle — a larger coverage pool, not yet a firm headcount commitment.

Casual staffing model

All staff casual initially, reviewed for part-time/full-time conversion once demand proves regular hours per role — likely exception for the Venue Manager (salaried from Day 1, given the critical-path nature of the role).

Rostering principle

Staff rostering follows pre-booked demand, not a fixed daily-headcount assumption — a standing, permanent operating rule at any volume level, not a ramp-up-period measure.

Venue Manager treatment-service fit

Desirable that the Venue Manager can step into treatment/service work if needed — a recruitment preference, not a hard requirement.

SOURCE & VERIFICATION

- docs/staff-plan.md — full roster detail, A8 VM/reception analysis
- docs/CURRENT-STATE.md §4 — headcount, solver-verified

Wages & Employment Costs

CURRENT AWARD RESEARCH, 2026-08-16

Real current casual rates researched via two independent, cross-referencing third-party payroll sources. **Not yet propagated into the headline P&L figures in Chapter 10** — that recompute is a distinct, larger technical task, deliberately not rushed. Professional payroll/Fair Work confirmation still recommended before contracts.

Current researched casual rates (1 July 2026)

ROLE	AWARD/LEVEL	CASUAL RATE	WAS (1 JULY 2025)	STATUS
Receptionist/Manager	Clerks MA000002 L2	A\$36.81/hr	A\$33.38/hr	RESEARCHED, +10.3%
Beauty/Massage Therapist	MA000005 L4	A\$37.50/hr	A\$37.00/hr	RESEARCHED, +1.4%
Nail Technician / Hairdresser	MA000005 L3	A\$36.81/hr	A\$35.63/hr	RESEARCHED, +3.3%
Phlebotomist	MA000027 SS Level 1-2	A\$33.71- 35.04/hr	A\$30.63/hr	RESEARCHED, CLOSEST-MATCH CLASSIFICATION, +10- 14%

Penalty rates

AWARD	SATURDAY	SUNDAY	PUBLIC HOLIDAY	STATUS
MA000005 (Hair & Beauty)	150%	175%	250%	UNVERIFIED AGAINST A PRIMARY SOURCE
MA000002 (Clerks)	125% or 150%	150%	250%	GENUINE, UNRESOLVED DISCREPANCY — TWO FIGURES FOUND, NEITHER PICKED

UNRESOLVED

Whether MA000027 treats Saturday 8am–4:30pm as ordinary hours (not penalty hours) for private pathology collectors is genuinely unconfirmed — a phone script to the Fair Work Infoline is ready to use. This is upside-only if resolved (would reduce, never increase, modelled Saturday phlebotomist cost).

Superannuation & on-costs

Superannuation

12%

of OTE — confirmed current for FY2026–27

VERIFIED

Workers' Compensation

1.7% (planning)

of Direct Labor — mandatory in WA for ALL workers incl. casuals

RATE IS ESTIMATE

Payday Super

From 1 Jul 2026

Pay super within 7 business days of each pay run — a new timing requirement, not yet reflected in the payroll schedule

Total labour cost — current headline (pre-wage-research recompute)

AM Direct Labor (weekday, FTE): **A\$48,254.67/month** — 2 phlebotomists + 8 treatment staff, identical headcount at both Table 1 and Table 2.

BUILT ON 1 JULY 2025 RATES — SEE THE CALLOUT ABOVE

Full cost build in Chapter 10.

Financial Model

CANONICAL HIERARCHY FOR THIS CHAPTER

Every figure below traces to docs/CURRENT-STATE.md and data/models/master_financial_model.yml — the venture's own single sources of truth. Table 1 is the **design/planning target**. Table 2 is shown throughout as a **HISTORICAL COMPARISON / SENSITIVITY REFERENCE ONLY** — never treat it as an alternative current plan.

Revenue — Table 1 (planning target) vs Table 2 (downside comparison)

MONTHLY REVENUE, STEADY STATE

REVENUE STREAM	TABLE 1 (TARGET)	TABLE 2 (COMPARISON)	CALCULATION
AM GTT packages	18 × A\$250 × 22 days = A\$99,000/mo	12 × A\$250 × 22 = A\$66,000/mo	Package 1 conservative price
PM standalone + set packages	Included in total	Included in total	~A\$95/session average ESTIMATE
Ancillary (retail/cafe)	A\$0	A\$0	Excluded from every P&L figure — placeholder, no derivation
Total Monthly Revenue	A\$155,215.80	A\$115,720.80	Canonical revenue methodology

Costs

LINE	TABLE 1	TABLE 2	NOTES
AM Direct Labor (weekday, FTE)	A\$48,254.67/mo	A\$48,254.67/mo	Identical headcount both scenarios
Saturday AM labor	Scales with the longer AM day	Lower (shorter day)	
Workers Comp (1.7%)	of Direct Labor	of Direct Labor	PLANNING RATE
Non-Wage Overhead	A\$13,980.00/mo	A\$13,980.00/mo	Rent/utilities, not volume-driven
Total Costs	A\$98,634.10	A\$94,664.16	

NOT YET IN THESE COST FIGURES

Real 2026-08-16-researched wage rates (Ch9), the revised insurance placeholder (A\$1,279/mo, Ch12), recalculated GTT supplies (A\$792/mo) — all researched, none yet propagated through this recompute. A distinct, scoped follow-up, not silently ignored.

Profitability

Net Operating Result — Table 1

+A\$56,582/mo

36.5% net margin

Quarterly — Table 1

+A\$169,745

Yearly — Table 1

+A\$678,980

Steady-state run rate, not a Year 1 actual

	TABLE 1 (TARGET)	TABLE 2 (COMPARISON)
Monthly Net Operating Result	+A\$56,581.70	+A\$21,056.64
Net margin	36.5%	18.2%
Quarterly	+A\$169,745.10	+A\$63,169.92
Yearly (steady-state run rate)	+A\$678,980.40	+A\$252,679.68

SUPERANNUATION-CORRECTED 2026-08-09

These are the current headline figures — the pre-superannuation figures (+A\$63,028.75 / +A\$27,084.69) are stale and retired.

AM standalone weekday contribution

AM revenue minus weekday AM direct labor only: **+A\$50,745.33/month (Table 1)** vs +A\$17,745.33/month (Table 2). This is the central finding behind adopting Table 1 as the planning target — 50% more daily clients at literally zero extra weekday labour cost, because these are fixed-salary FTE roles.

Capacity

Clients/day (target) 18
Operating days/month 22
Weekly AM slots 108 18 × 6 days

Market share at target

~21%

of ~515/week Perth GTT tests

Startup capital & funding requirement

FIGURE	AMOUNT	STATUS
Adopted planning figure (Pre-Opening Capital)	A\$251,198	"IN PRINCIPLE," NOT FINAL
+ Working Capital Reserve	A\$85,000–110,000	ESTIMATE
Combined funding–requirement case	A\$336,198–361,198	Current planning basis
Founder contribution	Self-funded (Anthony + Imara)	No external investor to date
Remaining requirement	Not quantified against a confirmed funding source	OPEN

SOURCE & VERIFICATION

- docs/CURRENT-STATE.md §5, §6, §7
- data/models/master_financial_model.yml
- docs/architecture/FINANCIAL-MODEL-SUMMARY.md — human-readable companion
- docs/architecture/CANONICAL-REVENUE-METHODOLOGY.md

Financial Sensitivity & Risk

Break-even & margin of safety

BREAK-EVEN VOLUME VS PLANNING TARGET — TABLE 1

Table 1 break-even

9.404/day

52.2% of target — **STRONG** margin of safety

Table 2 break-even

8.801/day

73.3% of its own (lower) target — **ACCEPTABLE**, thinner buffer

Sensitivity — honest labelling, not manufactured confidence

VARIABLE	DIRECTION OF RISK	ASSESSMENT
Client volume (referral pipeline fill rate)	Only 1 of 3 pathology partners in active dialogue	SENSITIVE — the single largest real risk to AM revenue
PM/AM→PM conversion	Structurally unknowable pre-opening	UNMODELLED — not stress-tested because no number exists yet
Insurance cost	Placeholder revised upward this round (A\$400→A\$1,279/mo)	SENSITIVE — real quotes could move this further, drafted request not yet sent
Wage rates	Real current rates now researched, +1.4% to +14% by role	SENSITIVE — not yet in the headline P&L
Rent	No confirmed venue, current figure is a planning estimate	HIGH RISK — genuinely unquotable pre-venue
Startup/fit-out cost	Internally-generated construction rate, not externally benchmarked	SENSITIVE , plausibly conservative (see Ch7)
Break-even margin (Table 1)	52.2% margin of safety	STRONG

Legal, Compliance & Pathology

Entity structure

YETI Holding Trust, trading as GTT Center Perth. Trustee: YETI Tipi Holdings PTY LTD. Anthony Zed (trustee, non-operational) + Imara (funding partner, trust beneficiary, no operational role). Revenue flows to the trust, never to any individual personally.

Pathology partnership — WDP status

CAREFUL, ACCURATE WORDING — DO NOT IMPLY A PARTNERSHIP EXISTS

GTT Center Perth is in **active dialogue** with Western Diagnostic Pathology (Carole Rivers, Customer & Commercial Manager) — several regulatory/operational questions resolved directly, a full collection-room specification received. **No agreement is signed. No partnership is confirmed.** The commercial rental figure remains outstanding. PathWest and Clinipath (contingency options) were emailed and remain unreplied-to.

Model: Option A — partner with an already-NATA-accredited pathology provider for collection oversight, rather than building in-house accreditation (a rejected 12–18 month path). GTT Center Perth employs the phlebotomist and provides the collection room; the pathology partner provides the accreditation umbrella, credentialing, and result reporting. GTT Center Perth does not diagnose, interpret, or communicate results.

Regulatory status table

ITEM	STATUS
Phlebotomist AHPRA registration	CONFIRMED NOT APPLICABLE
3D keepsake ultrasound — legal/unregulated in WA	CONFIRMED — never framed as diagnostic
Council planning/health-use permit	PENDING VENUE
Food business notification	LOW RISK AS CURRENTLY SCOPED — a sandwich/toastie upgrade would push to Medium Risk, see Ch4/Ch13
LEV compliance (nail station)	OPEN — OPEN-PLAN ADJACENCY TENSION FLAGGED
WorkCover WA registration	CONFIRMED MANDATORY, BEFORE FIRST HIRE — includes casuals
Curtain fire-rating (AS 1530.2/3)	RESOLVED — REAL COMPLIANT AUSTRALIAN SUPPLIERS IDENTIFIED
Privacy Policy / Consent Form	DRAFT — SOLICITOR REVIEW REQUIRED
Trademark clearance (both names)	KNOWN RISK — NOT PROFESSIONALLY CLEARED, DELIBERATELY DEFERRED

Insurance

REVISED PROVISIONAL, 2026-08-16 Placeholder of A\$1,279/month (up from an unexplained flat A\$400/month), the midpoint of this repo's own already-itemised A\$975–1,583/month estimate. A real quote-request draft exists, not yet sent. Public liability minimum A\$20M (NATA requirement), professional indemnity A\$5M.

Operations

Designed vs. waits for the venue

AREA	STATUS	DETAIL
Booking system	DESIGNED	Fresha, 1–2 admin seats (Venue Manager + Receptionist) — not per-staff accounts. GTT-pairing workaround specified.
Payment	DESIGNED	Full package price collected at booking (Fresha Pay); tiered cancellation-credit policy.
Opening/closing procedures	DESIGNED	Reception opens 7:15am; EOD Fresha report to Venue Manager.
Clinical workflow	DESIGNED	Synchronized dual-chair schedule, no-interrupt rule for wellness services.
Cleaning/inventory/procurement SOPs	PARTIALLY DESIGNED	Detailed lists exist; real supplier relationships wait for a confirmed venue.
Food/café service	TWO OPTIONS IDENTIFIED, NEITHER DECIDED	Pre-made supply (lower compliance burden) vs on-

AREA	STATUS	DETAIL
		site assembly (Medium Risk classification) — see Chapter 4/12.
Staff handover, AM/PM transition	MODELLED, NOT FINALISED	Common treatment pool rotates AM/PM; reception PM-coverage gap identified (Ch8).

Customer flow through the venue

Marketing & Demand Validation

Status — accurate labelling, no overclaiming

ELEMENT	STATUS
Public-ready landing page	BUILT, NOT LIVE — repo-ready, not deployed publicly
Waitlist demand-validation framework	DESIGNED — 6-factor, 100-point signup quality scoring
Real signups collected	NOT YET EXECUTED — zero, page is not public
Referral partnerships (midwife/OB)	IN PROGRESS — named practices identified, outreach not confirmed sent
AM→PM data-capture spec	DESIGNED — implementation gated on Venue Manager hire
Aggressive marketing push during fit-out	PLANNED — to run alongside, not after, referral partnerships

Waitlist target

500-700 SIGNUPS the current, tested-against-Month-1-volume target — replaces a prior, untested "300+" reference found insufficient once tested against the 18-client planning model.

Return-loop retention (see also Chapter 3)

The AM→PM conversion mechanism is designed and documented in full — the conversion rate itself is **structurally unmeasurable pre-opening** and is never presented as a modelled fact anywhere in this dossier.

Expansion & Long-Term Strategy

FRAMING, NOT A PLAN

Everything in this chapter is a possible future pathway — nothing below is committed, scheduled, or budgeted.

Capacity expansion pathway

Reframed 2026-08-16 as a genuine strategic choice: **a 3rd phlebotomist/chair at the existing venue** (marginal capacity, same fixed costs) vs. **a second location** (full cost-structure replication, full revenue-ceiling replication, a fresh referral pipeline). A real 3-chair scheduling solve against Table 1's cadence has not been run — flagged as the genuine next step, not attempted.

Second-site trigger

No fixed timeline — "set only after Venue 1 is running smoothly," per standing founder instruction.

Product/retail expansion

Parked, not built out: a branded practical maternity-aid line (TENS machines, birth balls, peanut balls, nasal aspirators) — genuinely distinct from the already-settled "no branded cosmetics line" decision, real suppliers identified (The Birth Store, TensCare Australia), not costed or committed.

Brand/geographic expansion

ELOWEN's "house of addresses" naming logic is the more proven multi-venue architecture of the two naming finalists, if expansion is ever pursued. A membership/loyalty tier has been raised independently by design exploration but remains an unevaluated future idea, not modelled.

SOURCE & VERIFICATION

- docs/scenario-d-investigation.md
- docs/strategy/BRAND-ARCHITECTURE.md

Current Execution Status

Aligned directly with docs/VERIFICATION-TRACKER.md's own top-level view (restructured 2026-08-16).

ACTION REQUIRED FROM ANTHONY

- Ask Carole (WDP) directly: in-house vs WDP-supplied phlebotomist?
- Confirm venue-search progress (any candidate ready to inspect?)
- Trademark attorney — engage now or continue deferring?
- Send the drafted WDP client-volume correction (18/day)
- Package price-increase timing (no urgency)

WAITING ON THIRD PARTY

- WDP commercial/rental figure — actively progressing
- PathWest / Clinipath replies — awaiting
- Medical waste — WDP's own setup, not researched independently
- Collector supervision sightline sub-question — WDP

GRACE/AI CAN PROGRESS

- MA000027 Saturday carve-out — Fair Work Infoline script ready
- EFTPOS/payment processing cost research
- Booking-software cost conflict reconciliation
- Full payroll recompute against 2026-08-16 wage research

CLOSED THIS ROUND (2026-08-16)

- Current wage/super/workers-comp/insurance research
- GTT supplies recalculated for 18-client model
- Spray tan removed from the concept entirely
- business-plan.md refreshed to v4.0

SOURCE & VERIFICATION

- docs/VERIFICATION-TRACKER.md — full detailed audit trail, 50+ items

Master Action Plan

WINDOW	ACTIONS ACTUALLY SUPPORTED BY THE CURRENT REPO
Next 7 days	Send accountant/insurance outreach (drafted); call Fair Work Infoline (script ready); ask Carole the phlebotomist–employment question; continue venue inspections.
Next 30 days	Trademark–attorney decision; itemised purchase list refined against a confirmed venue if one is secured; continue referral–partnership outreach.
After venue confirmed	Real builder quotes against the actual floor plate; council planning permit application; Venue Manager recruitment begins.
After WDP terms confirmed	Resolve phlebotomist employment model; finalise AM Direct Labor cost basis; sign pathology agreement.
Pre–opening	Waitlist campaign to 500–700 signups; full payroll recompute against current wage rates; real insurance/WorkCover quotes; fit–out.
Opening	Soft launch (waitlist–only), test operations runs, full public launch.
Post–opening	AM→PM data capture goes live; real conversion–rate measurement begins; first genuine sensitivity re–check against real trading data.
