GTT Center Perth

Business Plan

Western Australia's first premium waiting experience for expecting mothers having the Glucose Tolerance Test

Prepared by	Grace (Operations Manager) for Anthony Zed
Date	2026-10-17
Status	DRAFT for review. Not yet approved for release.
Version	v0.6
Business name	GTT Center Perth (working name; the trading name is still to be confirmed, see Appendix C)
Trading entity	A dedicated Australian proprietary company is recommended, subject to accountant and solicitor advice (see Section 9.7)
Stage	Pre-launch. No venue, no lease, no signed laboratory agreement, no trading data.
Currency	All figures in Australian dollars (A$)

Important notice. Every financial figure in this plan is a planning estimate from a financial model. The business has not opened and has no trading history. Items marked "to be confirmed" are not yet settled and are listed with the reason in Section 10 and Appendix B. Nothing in this plan has been sent to a laboratory, landlord, lender or investor.

1. Executive Summary

The business. GTT Center Perth turns the 2 to 2.5 hour wait for the Glucose Tolerance Test (GTT) into a restorative visit. The GTT is a standard pregnancy screening test. The expecting mother fasts, then has blood drawn three times over two hours. Today the wait is spent in a pathology waiting room. At GTT Center Perth the expecting mother books and pays in advance, has her blood drawn on site in a private collection room by certified phlebotomists, and uses the time between draws for massage, nails, hair or beauty services in a calm lounge. In the afternoons the same premises sells wellness services and packages to expecting mothers who are not having the test.

Why it should work. The test is recommended for every pregnant woman and nearly every expecting mother is offered it. Greater Perth recorded 24,271 births in 2024, roughly 467 tests a week. Our research found no equivalent venue in Western Australia. This is our own finding, not an independent audit.

The model. Wellness staff are employed (casual or permanent). GTT takes up to 18 clients each morning, Monday to Saturday, with the first booking at 07:00 and pairs of clients starting every 25 minutes. Expecting mothers book 2 to 4 weeks ahead and a waitlist backfills cancellations. Staff, phlebotomists included, are called in to match each morning's confirmed bookings, so idle staff are never rostered. GTT opens at full capacity: launch marketing and a pre-launch waitlist fill the diary before the first day, so the plan has no slow ramp-up period. Pathology testing and the courier are provided by the pathology partner, chosen from PathWest, Western Diagnostic Pathology (WDP) and Clinipath. GTT earns no pathology revenue.

Key numbers card

Measure	Base case (A$8,000 rent assumption)	At the A$10,500 gross rent ceiling
Morning capacity	18 clients a day (9 pairs, 2 chairs, 25-minute cadence)	same
Steady-state operating profit, per month (from Month 1)	**+A$35,186.40**	**+A$33,936**
Conservative "GST-stress" case, per month	+A$23,443	+A$22,306
Break-even, morning clients a day	**7.250** (about 40% of capacity)	7.440
Year 1 net operating profit (12 full months)	**A$422,237** (GST-stress A$281,311)	GST-stress A$267,675
Startup capital (base)	**A$336,198**	A$341,198
Peak funding	**A$251,198**	A$256,198
Lowest cash point	A$85,000 at opening	A$85,000 at opening
Payback	**Month 8** before GST timing, Month 11 after GST	not separately modelled

Conditions that travel with these numbers.

1. **Rent.** The cost model uses A$8,000 a month. The approved rent budget is A$9,500 to A$10,500 a month. The right-hand column shows the A$10,500 gross ceiling (rent, outgoings and car bays all in).
2. **Fill rate is the central risk.** The model assumes every released morning place fills (100%) from the first day. Each 1% of fill at capacity is worth about A$1,185 a month. At 85% fill, profit is about +A$17.4k a month. At 70% fill GTT roughly breaks even. At half a morning (9 a day) GTT still earns about A$11,517 a month, because the roster scales down with the bookings. This is why the pre-launch waitlist and the 2 to 4 week booking window are core to the plan.
3. **Clinical staffing.** Phlebotomists are rostered to the confirmed bookings like every other role: one phlebotomist for 1 to 9 bookings, two from the tenth booking, none in the afternoon, and a named second collector on call on lighter mornings. The break-even of 7.250 assumes bookings fall one to a time slot. The pathology partner and the Medicare rules may require the laboratory to supply the collectors, in which case the roster is the laboratory's decision (Section 5.4).
4. **Medicare.** The plan assumes the laboratory bills Medicare for the test. If Medicare did not pay and GTT absorbed the laboratory fee, it would cost about A$12,251 a month and lift break-even to 8.087 (Section 5.4).

Funding position. The planning need is A$336,198 to A$361,198 (A$251,198 pre-opening capital plus A$85,000 to A$110,000 working capital). Funds on hand are about A$200,000 (founder savings, to be confirmed). The gap on the peak-funding basis is about A$51,198. The funding route is to be confirmed.

Where we are. No venue is secured. No laboratory agreement is signed. Both are launch gates (Section 11). Hiring and fit-out wait behind them.

2. Value Proposition

2.1 The problem

Today	What expecting mothers get
Wait time	About 2 to 2.5 hours (some sources say up to 3)
Setting	A pathology waiting room, with draws at set times
Condition	Fasted, tired, unable to eat, unable to leave
Care during the wait	None

The glucose tolerance test is optional: every expecting mother chooses whether to have it. It is recommended for all pregnant women, usually between 24 and 28 weeks, by the Australasian Diabetes in Pregnancy Society (2025 consensus recommendations), and it is routinely advised by doctors and midwives. The choice that remains is where to have it.

2.2 The solution

Element	What GTT Center Perth provides
Blood collection	On site, in private collection rooms, by certified phlebotomists, under the pathology partner's Medicare approvals. Who employs the collectors is to be settled in writing with the partner (see Section 5.4).
The wait	Pregnancy massage, facials, nails, hair and brows between draws. Wellness services never interrupt a blood draw.
Lounge	Venue and lounge access (water and herbal tea) is free inside every package. In-lounge tablets are loaded with pregnancy guides and the intake forms.
Booking	Book and pay online in advance. Waitlist for popular mornings.
Results	The laboratory tests the samples and sends results to the expecting mother's doctor. GTT does not diagnose or interpret results.

2.3 Honest view of the advantage

Demand is real and nearly universal, and we are first. The experience itself is not hard to copy. The lasting advantage has to be built from relationships with midwives and obstetricians, a compliant collection room and a trusted laboratory partner.

3. Perth Market Analysis

3.1 Market size

Measure	2023	2024	Note
Registered births, Western Australia	32,031	30,541	Australian Bureau of Statistics
Registered births, Greater Perth	25,436	24,271	Australian Bureau of Statistics
Total fertility rate, Greater Perth	1.58	1.47	Births per woman
Perth births per week	489	467	24,271 divided by 52
Perth glucose tolerance tests per week (stand-in)		about 467	Births are used as a stand-in for tests. To be confirmed.
Women diagnosed with gestational diabetes		about 18% nationally	Australian Institute of Health and Welfare, 2023-24 hospital data. National, not specific to Western Australia.

Source: Australian Bureau of Statistics, Births, Australia 2024 (released 15 October 2025) and Data by region. **Update on release:** the Australian Bureau of Statistics publishes 2025 birth data on Friday 6 November 2026. GTT Center Perth will refresh this section the same day.

3.2 Our share of the market

Greater Perth recorded 24,271 births in 2024 (Australian Bureau of Statistics), about 467 a week. Gestational diabetes screening is offered to nearly every expecting mother, so we treat the weekly birth count as the weekly pool of glucose tolerance tests. At full capacity GTT Center Perth offers 108 morning testing places a week (18 a day over six days), about 23% of that pool. This is a ceiling on the places we can offer, not a forecast of bookings and not a claim of market control. Most expecting mothers will continue to be tested at their usual collection centre or hospital. GTT Center Perth is a premium, high-desire choice for the expecting mother who wants the wait to be comfortable and who books 2 to 4 weeks ahead. Our plan depends on filling our own places through referrals, the pre-launch waitlist and marketing, not on a large share of the market.

Measure	Figure
Planning capacity	108 morning places a week (18 a day, 6 days)
Capacity as share of Perth weekly tests	about 23%
Break-even volume as share of Perth weekly tests	about 9.3% (7.250 clients a day, about 44 a week, out of 467)

The honest question is not whether the market is big. It is whether we can win roughly 1 in 9 Perth expecting mothers through referrals and keep every released morning full.

3.3 Referral window

A GTT is usually done at 24 to 28 weeks of pregnancy (earlier for women with risk factors). A valid pathology request form from a doctor, obstetrician or midwife is the standard requirement. Each expecting mother therefore has several mornings that suit her, which supports advance booking.

3.4 Competitors

Competitor	What they offer	Position
Maternal and Infant Wellbeing Melbourne (MIWM)	GTT plus spa treatments, one client at a time. GP-led, clinical feel. Booked weeks ahead.	The only comparable business our research found in Australia. Victoria only.
Pathology collection rooms (PathWest, WDP, Clinipath and others)	The test only. Waiting room.	The current default. They are also potential partners.
Perth day spas	Discounted spa packages average about A$140.	Not GTT-linked. Price reference only.
Western Australian wellness-during-GTT venue	None found	Our research found no equivalent venue in Western Australia.

Benchmark: Maternal and Infant Wellbeing Melbourne (MIWM). Parkville, Victoria, is a boutique GP-led women's health and baby clinic that sells a glucose tolerance test with spa treatments. Packages: A$50 standard, A$220 with one 60 minute treatment and a short GP consultation, and A$400 to A$435 with two 60 minute treatments. Clients are seen one at a time, are booked weeks ahead, book through the HealthEngine platform, and pay on the day. The clinic shows there is demand for a premium test day. GTT Center Perth differs in three ways: up to 18 expecting mothers each morning, full payment at booking, and a lounge built around the test rather than a clinic with a spa add-on.

MIWM	GTT Center Perth
Single client at a time	Up to 9 pairs of clients a morning, staff rostered to bookings
Spa treatment fixed in the package	Expecting mother chooses her services
Pay on the day	Full payment at booking
No hairdressing	Full hairdressing menu
Victoria only	Western Australia

Sources are listed in Appendix A.

4. Services and Pricing

4.1 Morning GTT packages

Package	Price	What it includes
GTT Package 1	**A$250**	Venue and lounge free, plus 2 x 30-minute services (fixed)
GTT Package 2	**A$300**	Venue and lounge free, plus a choice of 2 x 45 minutes, 45 + 30 minutes, or 2 x 30 minutes

- Every morning package includes any service on the menu that fits the 30 or 45 minute wellness window (see 4.3).
- No package is sold lounge-only. Prices are GST-inclusive.
- The financial baseline prices every morning client at A$250, a deliberately cautious assumption. Package 2 upgrades are upside, not counted.
- The test itself is billed by the laboratory to Medicare, so the expected out-of-pocket cost for a Medicare card holder is A$0. If Medicare did not pay, the laboratory's own fee would apply; the Medicare schedule fee is A$25.85 a visit and no laboratory has quoted a fee yet (Section 5.4).
- **10% off after the test.** Any expecting mother who completes a glucose tolerance test can use 10% off standalone treatments or multi-service packages, morning or afternoon (Section 5.3).

4.2 Afternoon services

Afternoon services are stand-alone and pre-booked. They are not bound by the two-hour glucose test clock. Walk-ins are welcome when a therapist is free. The afternoon roster follows the pre-booked services.

Offer	Price	What it is
PM Refresh	**A$185**	75 minutes: massage plus mini facial (A$212 if bought separately)
PM Restore	**A$135**	75 minutes: manicure plus blow-dry (A$150 if bought separately)
Individual services	See 4.3	Available alongside the packages. Marketing leads with the packages.

Afternoon capacity is 10 sessions a day in the financial model.

4.3 Full service menu

Afternoon services are standalone bookings. "Fits the morning window" means the service can be taken inside the 30 or 45 minute wellness window of a testing visit. Prices are our own and have not been tested with customers.

Massage and beauty

Service	Duration	Price	Fits the morning window
Express pregnancy massage	30 min	A$75	Yes (30)
Standard pregnancy massage	45 min	A$120	Yes (45)
Full pregnancy massage	60 min	A$145	Afternoon only
Express glow facial	30 min	A$95	Yes (30)
Signature pregnancy facial	45 min	A$130	Yes (45)
Hydration facial	60 min	A$145	Afternoon only
Signature facial	75 min	A$175	Afternoon only
Brow thread and reshape	15 min	A$38	Yes (30 slot)
Brow wax and reshape	20 min	A$45	Yes (30 slot)
Brow wax and tint	25 min	A$55	Yes (30 slot)
Brow lamination	45 min	A$75	Yes (45)
Lash tint	20 min	A$30	Yes (30 slot)

Service	Duration	Price	Fits the morning window
Brow and lash tint combo	35 min	A$80	Yes (45 slot)
Lash lift and tint	45 min	A$95	Yes (45, tight)

Facial add-ons (to a 45 minute facial or longer): LED light therapy +A$35 (15 min, second trimester onward); scalp massage +A$25; decolletage treatment +A$30; hand and arm massage +A$20; jade roller or gua sha +A$20; hydrating eye mask +A$15; lymphatic drainage facial massage +A$30; HA serum infusion +A$20; collagen sheet mask +A$25; aromatherapy +A$15; brow wax and tint during facial +A$45. Massage add-ons: scalp massage +A$25 and foot and lower leg massage +A$25 (15 min each).

Nails

Service	Duration	Price	Fits the morning window
Classic manicure	30 min	A$55	Yes (30)
Gel manicure	45 min	A$75	Yes (45)
French gel manicure	50 min	A$85	Afternoon only
Express pedicure	30 min	A$55	Yes (30)
Spa pedicure	45 min	A$65	Yes (45)
Gel pedicure	50 min	A$80	Afternoon only
French gel pedicure	55 min	A$90	Afternoon only
Gel manicure and pedicure combo	80 min	A$140	Afternoon only
Acrylic full set	75 to 90 min	A$90 to A$120	Afternoon only
Acrylic infill	45 to 60 min	A$60 to A$80	45 minute infills only
SNS or dip powder full set	60 to 75 min	A$85 to A$110	Afternoon only

Nail add-ons: paraffin wax hands +A$30; paraffin wax feet +A$35; nail art +A$5 per nail; nail strengthening +A$15.

Hair

Service	Duration	Price	Fits the morning window
Blow-dry, short to medium	30 min	A$65	Yes (30)
Blow-dry, long	45 min	A$80	Yes (45)
Haircut (no colour)	30 to 45 min	A$60 to A$85	Yes
Hair mask and blow-dry	45 min	A$85	Yes (45)
Braiding or hair up	30 to 45 min	A$60 to A$75	Yes
Cut and blow-dry	60 min	A$95	Afternoon only
Scalp treatment and blow-dry	50 min	A$90	Afternoon only
Toner or gloss	30 min	A$65	Afternoon only (no chemical treatments on test day)
Single process colour	60 to 90 min	A$130 to A$200	Afternoon only
Half foil highlights	90 to 120 min	A$200	Afternoon only
Full foil highlights	2 to 3 hr	A$280 to A$350	Afternoon only
Balayage, half head	2 to 3 hr	A$270	Afternoon only
Balayage, full head	3 to 4 hr	A$360 to A$400	Afternoon only
Colour and blow-dry (single process)	2 to 3 hr	A$230 to A$280	Afternoon only

Lashes

Service	Duration	Price
Classic full set	90 min	A$140
Hybrid full set	2 to 2.5 hr	A$200
Volume full set	2 to 2.5 hr	A$280
Classic infill	50 min	A$99
Hybrid or volume infill	75 min	A$125

Private Refreshment Counter (for GTT clients only; pre-ordered or purchased; nothing is served during an active test): still water A$3, sparkling water A$4, herbal tea A$4, pregnancy-safe protein bar A$5 to A$7, fresh fruit cup A$5, coconut water or electrolyte drink A$5 to A$6, snack pack A$12. Retail: gestational diabetes snack pack A$20, low-GI recipe book A$30, pregnancy-safe nail polish A$18.

4.4 Revenue streams at steady state

Stream	A$ per month	Share
Morning GTT packages (18 clients a day x A$250 x about 26.33 trading days)	118,485.00	about 83%
Afternoon services and packages (10 sessions a day)	24,585.37	about 17%
Total revenue	**143,070.37**	100%

Not counted in the baseline (upside only): refreshment counter and retail income, Package 2 upgrades, and staff downtime fill.

4.5 Revenue and profit strategy

Seven levers lift morning revenue and profit and seven reduce cost. Each shows the monthly effect worked from the plan's figures; estimates are marked. Baseline: revenue A$143,070 a month, costs A$107,884, net A$35,186 (A$422,237 a year), about 474 morning visits a month.

Raise morning revenue and profit

#	Strategy	A$ effect per month	Basis
1	Show Package 2 (A$300, choice of 45 minute services) first at booking	Every 10% of morning clients choosing Package 2 adds 47 x A$50 = A$2,370 (A$28,440 a year). Staffing is already in place	Arithmetic; the 10% is a target
2	Add-ons sold at booking (facial add-ons A$15 to A$35, paraffin A$30 to A$35, scalp massage A$25, nail art A$5 a nail)	If 20% of visits take one add-on averaging A$25: about A$2,370	Estimate
3	Pre-order refreshments with the booking (nothing is free)	If half of visits pre-order A$8 on average: about A$1,900 revenue, margin lower	Estimate
4	Counter retail: gestational diabetes snack pack A$20, recipe book A$30	If 10% of visits buy one A$25 item: about A$1,185	Estimate
5	Gift vouchers for families and baby showers	New customers rather than extra capacity	Not valued
6	Protect the 18 a day: full prepayment at booking, waitlist backfill, reminder messages	One recovered morning place a day = 22 x A$250 = A$5,500 a month	Arithmetic
7	Pre-launch waitlist so the venue opens at 18 a day	Opens at full capacity with no slow build-up	Built into the plan

No price increase is planned in the first 12 months, so price is not a Year 1 lever.

Reduce expenses

#	Strategy	A$ effect	Basis
1	Adaptive rostering: roster only the staff that confirmed bookings need, phlebotomists included	Largest lever: it lowers break-even by about 5.4 clients a day against a fixed full roster (12.655 to 7.250)	Financial model
2	Rent in the lower half of A$9,500 to A$10,500 gross, and 3 to 6 months rent-free during fit-out	Each A$500 a month saved = A$6,000 a year. Three to six rent-free months at A$10,000 = A$30,000 to A$60,000, one-off	Arithmetic from the lease terms sought
3	Written wholesale per-test and collection fees from all three laboratories, then compare	Not valued until a fee is quoted	No fee quoted yet
4	Three insurance broker quotes	Not valued until quoted	Quotes pending
5	Stage marketing spend as channels prove themselves	Not valued	Marketing is held at A$1,500 a month in the model
6	Landlord fit-out contribution	Reduces startup capital	Not valued
7	One supplier for consumables, bundled with the fit-out sourcing packages	Not valued	Estimate once quotes exist

4.6 Cross-selling testing clients into the afternoon

The afternoon runs 10 sessions a day (about 210 a month). The morning supplies about 474 testing clients a month, so it is the natural source. Because the model already counts afternoon capacity as full, cross-selling protects the A$24,585 afternoon revenue rather than adding to it, unless the 10-session limit is lifted.

1. At booking: show the afternoon menu and the PM Refresh (A$185) and PM Restore (A$135) packages beside the morning package.
2. At intake, with consent: record the due date and preferred treatments, and pregnancy-safe notes for the therapist.
3. During the visit: the therapist who gave the 30 or 45 minute treatment mentions the longer version (a 30 minute facial at A$95 against a 60 minute hydration facial at A$145).
4. At checkout: book a standalone treatment on the lounge tablet with the 10% post-test discount (Section 5.3).
5. After the visit: a thank-you message (with consent) with the afternoon booking link; a second message at 34 to 36 weeks; a postnatal message after the due date.
6. Rebooking: every afternoon visitor is offered the next appointment at the desk, building a monthly treat rhythm until the due date.

If one in four testing clients books an afternoon treatment, that is about 118 sessions and A$13,800 a month of afternoon demand, more than half of what the afternoon needs. At one in ten it is 47 sessions and A$5,500.

5. Clinical Operations

5.1 Who does what

Task	GTT Center Perth	Pathology partner
Venue, collection rooms, chairs	Provides	Inspects and approves
Collection staff (phlebotomists)	Preferred: the laboratory places its own employed collectors in our rooms. Alternative: GTT employs them, which only works if Medicare payment for those specimens is confirmed in writing (Section 5.4).	Employs or engages the collectors it places and credentials them under its own quality system
Draws blood	The certified collection staff on site, as agreed with the partner	Collection approval and oversight
Courier and laboratory testing	No	Yes (one courier pickup per day)
Medicare billing for the test	No. GTT earns nothing from pathology.	Yes
Results to the doctor	No	Yes
Diagnoses or interprets results	Never	Not applicable (the doctor does)

Marketing must not say "we perform GTT testing". The phlebotomist's scope is pathology collection only.

5.2 Scheduling standard

Item	Standard
First booking	07:00. Expecting mothers arrive fasted, 10 minutes before their draw (06:50).
Chairs and phlebotomists	2 chairs. One phlebotomist for 1 to 9 bookings, two from the tenth booking, none in the afternoon. A named second collector is on call on lighter mornings.
Cadence	One cadence only: the 25-minute pair cadence. Pairs start at 07:00, 07:25, 07:50 and so on. Nine pairs, up to **18 clients** a morning. Last first draw 10:20.
Last first-draw limit	No later than 10:30 (laboratory guidance)
Rostering	Staff are called in to match confirmed bookings, morning and afternoon. A morning with one booking runs 1 phlebotomist and 2 therapists.
Booking	2 to 4 weeks ahead, prepaid, plus a waitlist
Trading days	Monday to Saturday

5.3 One client, one visit

Table 5.3: One client, one visit

Clock	Step
06:50	Arrives fasted, 10 minutes before the draw. Check-in, request form, Medicare card, two identity checks.
07:00 (0 minutes)	Draw 1 (fasting, about 5 minutes), then the glucose drink
After Draw 1	Wellness service 1 (30 or 45 minutes)
60 minutes exactly	Draw 2. Wellness services never interrupt a draw.
After Draw 2	Wellness service 2 (30 or 45 minutes)
120 minutes exactly	Draw 3. The expecting mother may leave only after this.
After Draw 3	Relax in the lounge, have something to eat or drink from the Private Refreshment Counter, or continue to pre-booked standalone services.

The client stays on site and seated or escorted throughout. Services are low-activity only. Specimens are labelled at the chair, stored in a medical fridge at 2 to 8 degrees C, physically separate from the refreshment counter, and handed to the courier in one pickup per day.

Refreshment counter. There is no free meal. Expecting mothers pre-order food and drink when they book, or buy from the Private Refreshment Counter in the lounge. Nothing is served during an active test.

10% off after your test. Every expecting mother who completes a glucose tolerance test with us can redeem 10% off a standalone wellness treatment or multi-service package. It is valid from the moment her test is complete, so a morning client who finishes her test can book the same day if a therapist is free, and it is also available in the afternoon. One redemption per completed test. Cannot be combined with other offers. Does not apply to the morning package, refreshments, retail or gift vouchers. Subject to availability. This replaces the earlier 10% online pre-booking discount: there is one 10% offer only.

Proposed terms, not yet confirmed: a 14-day expiry, "a test completed at GTT Center Perth", one redemption per test, the exclusion list and recording the redemption in the booking system. If these are not confirmed, only the first four sentences above are used and no expiry applies.

Table 5.3a: Cost of the 10% post-test discount (not deducted from the profit figures)

Take-up (share of testing clients who redeem)	Redemptions a month	Cost a month, one A$117 treatment	Cost, PM Restore A$135	Cost, PM Refresh A$185	Share of monthly profit (A$117)	Break-even after discount (A$117)
5%	23.7	A$277.25	A$319.91	A$438.39	0.8%	7.293
10%	47.4	A$554.51	A$639.82	A$876.79	1.6%	7.335
15%	71.1	A$831.76	A$959.73	A$1,315.18	2.4%	7.377
25%	118.5	A$1,386.27	A$1,599.55	A$2,191.97	3.9%	7.461
40%	189.6	A$2,218.04	A$2,559.28	A$3,507.16	6.3%	7.587

How it pays for itself. The discount costs 10% of each redeemed booking. At 25% take-up on a typical A$117 treatment it costs about A$1,386 a month, 3.9% of monthly profit, and raises break-even from 7.25 to 7.46 clients a day. It pays for itself if one redeemer in ten is a new booking that would otherwise not have been made (when the therapist's time is already paid), or about one in four (24%) if extra hours must be paid. Take-up and the share of new bookings are planning assumptions, not data.

5.4 Pathology partner options

Table 5.4: Pathology laboratory options

	Western Diagnostic Pathology (WDP)	PathWest	Clinipath
Role	Priority partner	Contingency	Contingency
Fee per test	No fee quoted yet	No fee quoted yet	No fee quoted yet
Collection or rental fee	No fee quoted yet	No fee quoted yet	No fee quoted yet
Courier	One pickup per day	Under assessment (grey top tubes may allow courier collection)	Not yet discussed
Turnaround	Not yet quoted	Not yet quoted	Not yet quoted
Contact status	In active discussion since July 2026; formal partnership steps requested	Replied in August 2026, progressing	Approached July 2026, awaiting reply

No laboratory has yet quoted a fee. Written per-test and collection fees will be requested from all three before a partner is chosen.

Pathology accreditation and approvals. Pathology collection at GTT Center Perth operates under our pathology partner's accreditation and Medicare approvals. A company that only collects blood cannot be an Approved Pathology Authority: under the Health Insurance Act 1973 only an authority that owns and runs an accredited laboratory can hold an approved collection centre. Only the laboratory applies for the approved collection centre for our rooms, on an occupation agreement with us, and it gives the undertaking to follow the national collection standard. GTT cannot apply to Services Australia for

the approval, and building our own laboratory is not a practical option for this plan. The collection rooms are designed to the national standard for approved pathology collection centres: two equal dedicated rooms (or a single large room with a clinical privacy curtain between two collection bays), each with its own specimen fridge and a hand wash basin. If two collection rooms create an approval difficulty, the single large room with a curtain partition is the fallback design.

How bulk billing works. For a Medicare card holder, the laboratory bills Medicare for the test and the client pays the laboratory nothing, so GTT carries no pathology cost or revenue. The Medicare schedule fee for one visit is A$25.85: item 66548 (the pregnancy glucose tolerance test, A$19.90) plus item 73928 (the collection episode, A$5.95). Laboratory private fees may differ and no laboratory has quoted a fee yet.

The collector question. Medicare pays for a specimen collected at an approved centre only where the person collecting is the pathologist or an employee of the approved pathology authority. Centre approval itself also accepts collectors who are engaged by the authority under a contract that lets it direct and control their work, but the wording of the payment rule does not mention contractors. For that reason the preferred arrangement is for the laboratory to place its own employed collectors in our rooms, with GTT hosts supporting each expecting mother through the two-hour wait. If a laboratory does supply the collectors, GTT's collector wage cost (about A$6,682 a month for each collector on shift) falls away, less any market-value charge the laboratory may make. None of this is agreed with any laboratory yet.

Table 5.4a: What happens if Medicare does not pay (monthly, 18 clients a morning, 26.33 days)

Scenario	Lab fee borne by GTT per client	Cost per month	Net operating profit per month	Break-even clients per morning
Laboratory bulk-bills Medicare (plan)	A$0.00	A$0.00	A$35,186.40	7.250
Laboratory supplies its own employed collectors, no charge (upside, only if agreed in writing)	A$0.00	A$0.00, and collector wages of A$13,364 a month are saved	A$48,550.92	6.235
Client pays the laboratory directly	A$0.00	A$0.00	A$35,186.40 if bookings hold	7.250
GTT absorbs the Medicare schedule fee of A$25.85	A$25.85	A$12,251.35	A$22,935.05	8.087

If GTT absorbed the fee, Year 1 profit would fall by about A$147,016 (from A$422,237 to A$275,221). The package price needed to stay whole is A$275.85 (GST aside). If the client pays the laboratory directly, GTT's profit is unchanged but the client's outlay rises by about A$25.85, which may weigh on demand.

Table 5.4b: Ways to make bulk billing work, ranked by feasibility

Rank	Route	What it does	Who must agree
1	The laboratory places its own employed collectors in our rooms	Fits the Medicare payment rule exactly. Removes GTT's collector wages, less any charge by the laboratory.	The laboratory; Services Australia for the centre approval
2	Hybrid: a laboratory-employed collector takes every specimen and GTT hosts do everything else	Keeps the host experience in GTT's hands. GTT staff must not collect.	The laboratory; roles written down
3	The laboratory engages GTT's collectors under a contract giving it direction and control	Acceptable for centre approval. Whether Medicare pays for these specimens is unclear.	The Department of Health in writing; a health lawyer
4	GTT-employed collectors seconded to the laboratory for the morning	Weakest route. Improved if they become fixed-term employees of the laboratory (route 1).	As route 3
5	Fallback: the client pays the laboratory privately, or GTT absorbs the fee	Lawful. Cost is shown in Table 5.4a.	The accountant

The recommended approach is to open with routes 1 and 2 with each laboratory and let its written answer decide. Nothing is signed and nobody has been asked yet. Written answers are needed from the laboratories, from Services Australia (on the approval, one room with two chairs and a curtain, and the occupation document) and from the Department of Health (on the employee-or-contractor question), before any fit-out money is spent.

Western Australian licence. No Western Australian state licence category for a private blood collection room has been found. The private hospital licence covers hospitals, and a collection-only room does none of the procedures that define a day hospital. Accreditation belongs to the laboratory, not the room. Council planning, building and health approvals still

apply. Written confirmation from the Department of Health and the local council has still to be obtained. If GTT rostered a registered nurse and offered facilities for medical attention, a regulator could treat the venue differently, so the clinical role is kept to laboratory collectors and first aid.

5.5 Compliance

Table 5.5: Compliance

Area	Position	Status
Collection room standard	National Pathology Accreditation Advisory Council guidelines for Approved Pathology Collection Centres (third edition, 2013)	Design stage
Laboratory accreditation	Covered by the partner's accreditation. GTT needs none in its own name.	Under the partner
Phlebotomist qualification	Certificate III in Pathology Collection (code HLT37525). Phlebotomists are not registered with the Australian Health Practitioner Regulation Agency.	Hiring on hold
Beauty and nail services	Western Australian skin penetration regulations apply to these services only	To be met at fit-out
Privacy	Privacy Act 1988 (Cth). Health data is sensitive. GTT does not hold results.	Policy in draft
Consent form and privacy policy	Drafts. Solicitor review required before any client data is collected.	Open
Referral law	No payment, reward or perk to any doctor or midwife for referrals (Health Insurance Act 1973 (Cth) and advertising rules)	Policy set; wording review open
Insurance	Public liability, products liability, professional indemnity, workers compensation: no broker quote yet. Clinical and cyber cover to be settled.	Open
Medicare approved collection centre	Held by the pathology partner only. GTT cannot hold it or apply for it.	Partner and Services Australia to confirm
Western Australian licence for a blood collection room	No state licence category found for a collection-only room	Written confirmation from the Department of Health still to be obtained
Emergency procedures	Emergency plan drafted. Hypoglycaemia and needle-stick procedures still to be written.	Open

General information only. Each item must be verified with the adviser or regulator before external reliance.

5.6 Healthcare referrals

GTT Center Perth does not pay, reward or offer perks to any doctor, midwife or other practitioner for referrals. Federal law prohibits benefits that induce pathology requests, and we keep clinical decisions independent. We provide neutral information to doctors and midwives so they can tell their patients that the service exists, and every expecting mother remains free to choose her own doctor and her own pathology collection site.

5.7 Risk protocol for pregnancy complications

Every client completes a pregnancy health declaration and consent form, and a request form check, before any service. Wellness services never interrupt a blood draw. Staff are first aid and CPR trained and are trained to recognise faintness and low blood sugar in fasting clients. Any collapse, fall, bleeding, pain, reduced baby movement or doubt stops all services immediately and triggers the emergency plan (000 where needed, and the pathology collector). Every event is recorded in an incident register, reported to our insurer within 24 hours, and reviewed monthly. Public and products liability, professional indemnity and workers compensation insurance cover the venue, and the clinical care of the test remains with the pathology partner.

6. Site and Premises

6.1 Requirements

Item	Requirement
Floor area	**257 to 290 sqm** net usable. 257 sqm is the minimum.
Blood collection rooms	**2 equal dedicated rooms of 19.0 sqm each** (the middle of the 18 to 20 sqm range, subject to the partner's confirmation), solid walls, one lockable door each, each with its own specimen fridge, or one large room divided by a clinical privacy curtain between two bays. A hand wash basin in each bay.
Lounge	Open-plan luxury lounge with the **Private Refreshment Counter (exclusive to GTT clients)**
Rent budget	**A$9,500 to A$10,500 a month gross** (base rent plus estimated outgoings, excluding GST). A$10,500 is the hard all-in ceiling.
Level and access	Ground floor only, accessible path of travel, accessible toilet, doors at least 850 mm clear in clinical rooms
Parking	8 to 10 or more client bays and 3 to 5 staff bays, well lit
Services	3-phase power, plumbing for hands-free basins in each collection bay and at treatment bays, working ventilation and air conditioning, good internet
Hours	Monday to Saturday. Clients arrive from about 06:45.
Permitted use	Health, beauty and wellness services, including pathology specimen collection and a small refreshment counter

6.2 Lease terms sought

Term	Seeking
Initial term and option	3 years plus a 3-year option
Rent review	Fixed percentage or CPI, no ratchet clause
Rent-free	3 to 6 months during fit-out
Collection rooms	The lease must allow the pathology partner an occupation agreement for the collection room, and a change of partner later
Make-good	Negotiated. Avoid full reinstatement of blood room plumbing.
Personal guarantee	Cap at 6 months rent. Tenant entity to be confirmed.
Lease bond and legal	About A$19,600 to A$27,600 (modelled)

No landlord contribution is counted in the financial model.

6.3 Target areas

Table 6.3: Search corridors

Priority	Area	Why
1	Kwinana Freeway corridor: Murdoch, Myaree and the medical precincts around Fiona Stanley Hospital and St John of God Murdoch	Freeway access and the main health precinct south of the river
2	Cockburn and Jandakot	Southern corridor, freeway access, large catchment of young families
3	Cannington and East Cannington	Albany Highway and Roe Highway, near Bentley Health Campus
4	Osborne Park	Freeway access, strong parking stock

The search corridor covers the Kwinana Freeway corridor, Cockburn, Jandakot, Cannington, Osborne Park, Murdoch and the medical precincts.

6.4 Property shortlist, redone October 2026

The property shortlist is being redone. The August list has been withdrawn after its leading site was leased on 24 August 2026. The October 2026 search is summarised below and will be updated weekly. Three listings are conditional matches on size and rent; none meets every criterion yet, and the search continues.

Rank	Address	Size	Advertised rent	Position against criteria
1	5 Fiona Wood Road, Murdoch	100 to 645 sqm ground floor, new development	Not published	Best location, details to confirm
2	9/110-114 Bannister Road, Canning Vale	298 sqm	A$80,000 a year plus outgoings and GST (about A$8,900 to A$10,300 a month gross, indicative)	Fits size and rent, other criteria to confirm
3	13/386 Scarborough Beach Road, Osborne Park	263 sqm	A$95,000 a year plus outgoings and GST (about A$9,900 to A$11,100 a month gross, indicative)	Rent at the ceiling

The nearest medical building (25 Mills Street South, Cannington, 330 sqm) is advertised at A$15,000 a month before outgoings. No agent has been contacted.

Status. No venue, no lease, no heads of agreement. The collection room specification must be obtained in writing from the laboratories before any lease is signed. An architect will be engaged once a site is chosen. Fit-out has not been repriced for the larger footprint.

6.5 Concept floor plan

A concept floor plan (version 2) is used to brief the architect, obtain fit-out quotes and source furniture and fixtures, including direct from China where compliant. It is a single drawing of about 289 sqm (18.5 m by 15.6 m), inside the 257 to 290 sqm search range. It is a concept only, not for construction, and is subject to site survey, architect and building code compliance. The full drawing, change list and shopping list by room are in the companion page, floor-plan-v2.html, in the same folder as this plan.

- **Two equal blood collection rooms of 19.0 sqm each**, each with its own specimen fridge under the bench, a hand wash basin, a recovery recliner and a documentation bench. There is no separate fridge room. The alternative of one large room divided by a clinical privacy curtain is shown as an inset.
- **Every room opens onto a corridor or the lounge.** No room is reached only by walking through another.
- **Clean and dirty routes are separate.** Clinical waste and soiled linen leave by a separate service door along a staff-only corridor and never cross a client area. Staff reach the staff room without passing the service and linen area, and the staff room opens to both corridors.
- **Shared amenities.** One accessible and one standard toilet serve clients and staff. There is no separate staff toilet. The number of toilets is confirmed by the architect and building surveyor.
- **Bay sizes.** Hair and nail areas are sized at 5 to 6 sqm per station (about 24 sqm for hair and 22 sqm for nails). Each massage and beauty bay is about 10.7 sqm with partition walls, a privacy curtain and a hand wash basin. The open luxury lounge is about 45 sqm beside the Private Refreshment Counter, which is kept apart from specimens and clinical waste.
- **Quantities to price.** A second specimen fridge and a second recovery recliner (one in each room) and possibly a second centrifuge are quantity changes not yet priced in the financial model.

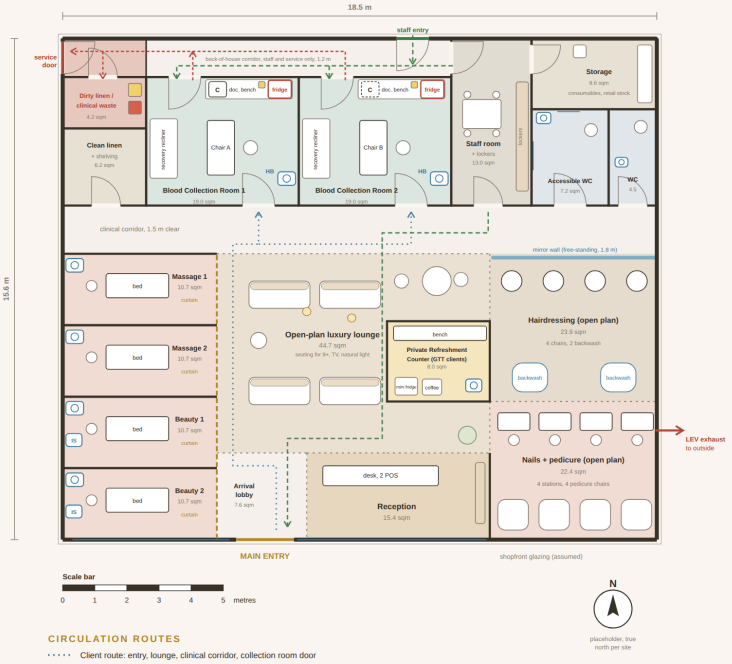

GTT CENTER PERTH

Concept Floor Plan and Layout Schematic, version 2

CONCEPT ONLY. NOT FOR CONSTRUCTION.
Subject to site survey, architect and NCC compliance.

Option A shown: two equal blood collection rooms, each with its own specimen fridge. Option B (one large room with clinical privacy curtain) is in the inset.

Typical rectangle 18.5 m x 15.6 m = 288.6 sqm gross internal. Site Brief range about 257 to 290 sqm. Scale 1:100 at A1 (see scale bar).

LEGEND

- Blood collection (solid walls)
- Dirty zone: service entry, clinical waste, dirty linen
- Massage / beauty bay (partition walls + curtain)
- Open-plan lounge / open plan zones
- Private Refreshment Counter (GTT clients only)
- Reception
- Staff room
- Storage and clean linen
- Toilets (accessible + standard)
- Circulation
- Privacy curtain track
- Solid partition wall
- LEV exhaust to outside (nails)
- HB handwash basin (IS = instrument sink)
- Open-plan boundary (no wall)
- Under-counter clinical specimen fridge

C = centrifuge. Dashed C in Room 2 = space kept for a second unit (quantity TO CONFIRM with the pathology partner).

AREA SCHEDULE (drawn sqm against reference target)

Zone	Drawn	Reference target	Source of target
Blood Collection Room 1	**19.0**	19 (mid of 18 to 20)	Pathology partner brief; venue room schedule
Blood Collection Room 2	**19.0**	19 (equal to Room 1)	Venue room schedule; AusHFG room 12 min
Massage 1 and 2	**10.7 each**	12 each	Venue room schedule
Beauty 1 and 2	**10.7 each**	11 each	Venue room schedule
Open-plan luxury lounge	**44.7**	35	Venue room schedule (exceeded)
Private Refreshment Counter	**8.0**	8	Venue room schedule
Reception	**15.4**	15	Venue room schedule
Hairdressing (4 chairs, 2 backwash)	**23.9**	20 to 24 (5 to 6 per chair)	Brief 2026-10-17; salon sizing guides
Nails + pedicure (4 stations)	**22.4**	20 to 24 (5 to 6 per station)	Brief 2026-10-17; salon sizing guides
Accessible WC	**7.2**	7	Venue room schedule
Standard WC	**4.5**	4	Venue room schedule
Staff room + lockers	**13.0**	10	Venue room schedule
Clean linen	**6.2**	6	Venue room schedule
Dirty linen / clinical waste	**4.2**	4	Venue room schedule
Storage (consumables, retail stock)	**8.6**	not separately scheduled	Procurement list: shelving items
Service entry (dirty route)	**3.1**	not separately scheduled	New in v2
Circulation (clinical corridor, staff corridor, arrival lobby)	**46.7**	16	Venue room schedule (corridor only)
Total gross internal (18.5 m x 15.6 m)	**288.6**	**257 to 290 range**	

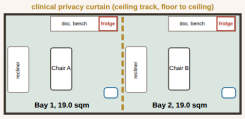

Both collection rooms are drawn at 19.0 sqm, the middle of the pathology partner brief range of 18 to 20 sqm (the 9 sqm figure is the partner's minimum floor, and AusHFG shows 12 sqm for a single enclosed collection room). Each room carries its own specimen fridge, handwash basin, bench, chair, recovery recliner and documentation bench. Hair and nails are drawn at 5 to 6 sqm per station. All areas are indicative.

CIRCULATION ROUTES

- Client route: entry, lounge, clinical corridor, collection room door
- Staff route: staff entry and staff room to clinical and back-of-house corridors
- Dirty route: clinical waste and soiled linen to the service door (staff only)

Staff reach the staff room from the clinical corridor or the back-of-house corridor, never through the dirty zone (red tint).

OPTION B INSET: ONE LARGE COLLECTION ROOM WITH CLINICAL PRIVACY CURTAIN

One room, 38.0 sqm (2 x 19.0)
Same equal-size logic as Option A, each bay keeps the 19.0 sqm, its own under-counter specimen fridge, handwash basin, recovery recliner and documentation bench; the dividing wall is replaced by a full-height clinical curtain on a ceiling track. Doors to the clinical corridor and the back-of-house corridor are as in Option A. Curtain gives visual privacy only. Sound privacy is lower than two walled rooms (to confirm with the pathology partner).

Concept only, not for construction; subject to site survey, architect and NCC compliance. GTT Center Perth. Drawing date 2026-10-17, version 2.

7. Marketing Strategy

7.1 Principle

The main customer channel for the morning GTT is the referring practice and the pre-launch waitlist, supported by paid and organic channels. Every expecting mother already needs a request form for the test. The task is to make the practice and the expecting mother aware that a better place to have it exists. The afternoon customer is more discretionary and finds us through Instagram, Google and word of mouth. Every ad, caption, card, voucher, email and web page is approved by Anthony before use.

7.2 Morning GTT: referral network

Element	Plan
First-wave targets	22 named practices already identified: 12 private midwifery practices and 10 obstetric and gynaecology clinics. None contacted yet.
Why these	Independent enough to recommend a collection venue. Hospital-based public clinics tend to have a default pathway, so the public-sector channel is lower priority.
Test batch	First 3 midwifery practices with a direct personal contact. Expand to the remaining 19 only after all 3 have a recorded outcome.
Approach	Personal visit or call first, then an information card, a one-page practice information sheet, and an invitation for the practice's staff to experience the service once open
Doctor channel	Target bulk-billing practices with high antenatal volume near the confirmed venue
Timing	Pre-launch activity that depends on a confirmed venue address

Each visit must end in one recorded outcome: the practice displays cards, accepts a complimentary visit, or declines. Tracking uses the "How did you hear about us?" field in the booking system; it is a named Venue Manager responsibility from week 1 of opening. **Referral law.** No doctor or midwife receives a payment, gift or other benefit for referring a client (Section 5.6).

7.3 Online booking and waitlist

Element	Plan
Website	Waitlist form (name, email, mobile, suburb, due date, services of interest, how they heard of us), how-it-works page, service menu with prices, embedded online booking, FAQ
Booking	Online, prepaid, 2 to 4 weeks ahead. Roster published 1 to 2 weeks ahead from confirmed bookings.
Waitlist role	Fills the diary before opening so GTT opens at 18 bookings a morning, then backfills cancellations
Waitlist targets	100 sign-ups by week 13 and 300 or more by week 18 (planning target, to be tested against the 18 a day capacity)
Waitlist launch	48-hour priority booking window for waitlist members before public launch

7.4 Marketing channels

Channel	What we do	Measure
Meta Ads (Facebook and Instagram)	Two campaigns: waitlist sign-up from the pre-launch stage (expecting mothers 18 to 28 weeks, Perth metro, 25 to 40), then a booking campaign once open. "Your glucose tolerance test, without the waiting room. Book 2 to 4 weeks ahead." Image of the lounge, not blood. No health outcome claims.	Cost per waitlist sign-up; cost per booking
Instagram Reels	Three series, three posts a week: "Test day at GTT Center Perth", "What to pack for your glucose test", "Behind the lounge". Captions say booking is by appointment, 2 to 4 weeks ahead.	Reach, saves, waitlist link clicks
Google Search	Search ads and a landing page for "glucose tolerance test Perth", "GTT Perth", "gestational diabetes test Perth", and for the afternoon "pregnancy massage Perth". No claims about the pathology result.	Click to booking rate
Google Maps (Business Profile)	Claim and complete the profile at opening: category, hours (Monday to Saturday), photos, services, booking link. Ask every client for a review with no reward. Reply to every review without discussing any client's health in public.	Profile views, direction requests, review count and score
Word of mouth	A friend card in every takeaway bag; a gift voucher for baby showers; a "bring a friend" afternoon booking. Any discount is a published offer open to everyone, never tied to a doctor or midwife.	Share of bookings that name a friend

Advertising rules: no testimonials about clinical care, and no claim that we improve a test result or any health outcome.

7.5 Events across Perth

Date	Event	Audience	Action
Sunday 18 October 2026	Perth Pregnancy, Birth and Postpartum Expo, Scarborough (free)	Expecting mothers, doulas, midwives	Attend as a visitor. Confirm the date with the organiser first.
Friday 6 November 2026	Australian College of Midwives Western Australia State Conference	Midwives	Ask about delegate or sponsor options
10 and 11 April 2027	Pregnancy, Babies and Children's Expo, Perth Convention and Exhibition Centre	Largest early-parenting audience in Western Australia	Decide whether to exhibit
About June 2027	GP seminar on women's and children's health (Healthed)	Doctors	Watch for the 2027 date
About September 2027	St John of God Women's Health Masterclass	Doctors, women's health clinicians	Watch for the 2027 date
About June 2027	RACGP Western Australia faculty education day	Doctors	Watch for the 2027 date

No public series of dated Perth GP and midwife breakfast events was found. Plan: host our own GP and midwife morning tea at the venue once it is fitted (three sessions in the first quarter, light breakfast, a short walk-through of the testing day, no payment or gift to any attendee). Dates are to be confirmed after a venue exists. Dates marked "about" follow the pattern of the 2026 events and are not announcements.

7.6 Notifying Perth doctors and private obstetricians

We will notify Perth GPs and private obstetricians through WA Primary Health Alliance and HealthPathways WA, practice visits with an information sheet and booking cards, and a quarterly email to practice managers. No doctor or midwife receives a payment, gift or other benefit for referring a client. The information sheet says what the service is, hours, how to book, that the test follows the laboratory partner's process, and that GTT Center Perth does not diagnose or interpret results.

Expecting mothers without a request form. Expecting mothers need a request form for the test. Those without one are pointed to their doctor, midwife or obstetrician, and told that some online telehealth doctors can issue a pathology request when clinically appropriate. Expecting mothers who do not yet have a referral can see their own doctor, midwife or an

independent telehealth doctor of their choice. GTT has no commercial relationship with, and receives or pays no money to, any doctor or telehealth service.

Public hospital patients. For expecting mothers who prefer a calm, private setting, GTT Center Perth offers an appointment-based alternative to a busy collection centre, including for patients of King Edward Memorial Hospital and Fiona Stanley Hospital who want comfort over a crowded waiting room. Public hospital collection remains an excellent option. We make no claim of shorter waits or better clinical care.

7.7 Afternoon demand

Element	Plan
Offer	Lead with PM Refresh and PM Restore. Individual services stay visible as a secondary option.
Cross-selling	Testing clients are offered standalone treatments (Section 4.6) with the 10% post-test discount (Section 5.3).
Partners	Prenatal yoga studios, women's health physiotherapists, antenatal class providers, doulas, maternity retailers and pregnancy photographers
Group bookings	Antenatal cohorts, baby-shower groups, mother and daughter visits
Paid search	Separate afternoon campaign for pregnancy wellness terms
Retention	Post-visit review request and a re-booking nudge

Afternoon volume is a modelled assumption of 10 sessions a day. It has no booking data behind it yet.

7.8 After-hours workshops

Evenings and Saturday afternoons, when the lounge is otherwise closed, host antenatal and birth education run by qualified midwives, physiotherapists and lactation consultants. Prices are proposals in line with Perth classes (a comparable Perth two-evening course is A$150 a couple).

Workshop	Format	Who runs it	Capacity	Proposed price (for Anthony to set)
Birth Basics	Two weekday evenings, 6.30 to 8.30 pm	Registered midwife or childbirth educator, engaged as a contractor	12 couples	A$150 to A$180 per couple
Birth Preparation Saturday	One Saturday afternoon, 1.30 to 5.30 pm, with afternoon tea from the refreshment counter	Midwife plus physiotherapist	12 couples	A$190 to A$240 per couple
Hypnobirthing	Three weekend sessions	Accredited hypnobirthing practitioner	8 couples	A$285 to A$300 per couple
Feeding and Settling Night	One evening, 2 hours	Lactation consultant	15 parents	A$45 to A$60 per person
Prenatal Yoga	Weekly evening, 60 minutes	Qualified prenatal yoga teacher	10	A$25 to A$35 per person

Instructors are independent, insured and qualified. The venue provides the room, bookings, refreshments and marketing, and shares revenue (suggested split 60% instructor, 40% venue, an estimate to test with the first instructor). Four Birth Basics courses a year would add about A$3,000. Workshops serve clients and feed the afternoon menu; they are not a main profit line. Classes are education, not medical advice.

7.9 Postnatal strategy

With her consent, each expecting mother's due date is recorded at booking so we can send timed, optional offers: a pregnancy massage reminder at 34 to 36 weeks and a postnatal treatment about two weeks after her due date. Messages stop on request. A due date is health information, so consent is explicit, optional and withdrawable under the Privacy Act. The privacy policy and consent form go to a solicitor before use.

8. Team and Staffing

8.1 Principle: adaptive rostering

Staff are called in to match the confirmed bookings, morning and afternoon, phlebotomists included. GTT never rosters idle staff. A morning with one booking runs one phlebotomist and two therapists, not a full team. Up to nine bookings run one phlebotomist and four therapists. From the tenth booking both collection chairs run, with two phlebotomists. There is no phlebotomist in the afternoon. On lighter mornings a named second collector is on call for a difficult draw or a faint.

Roster logic. Staffing follows overlap, not headcount. Each client has three timed blood draws and two 45-minute wellness services, and pairs start 25 minutes apart. One chair carries up to nine clients because no two draws ever fall together, so one phlebotomist is rostered. From the tenth booking two clients share a time slot, two draws fall together and the second chair opens. One client: 1 phlebotomist and 2 therapists. Two to nine clients, one per slot: 1 phlebotomist and 4 therapists. Ten clients: 2 phlebotomists and 6 therapists. Eleven to eighteen clients: 2 phlebotomists and the full 8 therapists (4 massage and beauty, 2 nails, 2 hair). The roster is published one to two weeks ahead from the confirmed bookings. Afternoon sessions are fully adaptive and follow the pre-booked standalone services; walk-ins are accepted only when staff are free.

Clinical safety. A named second collector is on call on mornings with nine or fewer bookings. If a first collector cannot obtain a sample after two attempts, the second collector attends; if she cannot, the client is rebooked or referred back to her doctor or midwife in line with the pathology partner's protocol. A client who feels faint is seated or laid down, the Venue Manager attends immediately and the recovery chair is used; the collector continues with the next client.

One honest line. The pathology partner and the Medicare rules may require the laboratory to supply the collectors, in which case the collector roster is the laboratory's decision (Section 5.4).

8.2 People on the books

GTT keeps 21 people on the books: 1 Venue Manager; 4 phlebotomists; 12 morning therapists (6 massage and beauty, 3 nail technicians, 3 hairdressers); and 4 afternoon therapists (massage, beauty, nails, hair). Only as many work a morning as the bookings need: one phlebotomist up to nine bookings, two from ten, and up to 8 therapists. The extra people cover leave, illness and Saturdays, and supply the on-call second collector on lighter mornings, so that at least 95% of days are fully staffed (phlebotomists 99.8%). All are casual initially, reviewed for part-time after 3 to 6 months. Employment type for the Venue Manager and phlebotomists is to be confirmed.

Role	Number	Basis	Notes
Venue Manager	1	Monday to Friday, 07:00 to 15:00	Not yet hired. Covers reception from 07:00 and is the first responder, first aider, EpiPen holder and fire warden. An experienced rostered staff member covers reception on Saturday. Hire is gated behind the laboratory agreement and the venue.
Phlebotomists (certified)	1 or 2 on shift, 4 on the books	Casual, review at 3 to 6 months	One for 1 to 9 bookings, two from 10, 07:00 to 13:00; none in the afternoon. Relief pool because nobody else can cover phlebotomy. Employer to be settled in writing with the pathology partner (Section 5.4).
Morning therapists	up to 8 on a full morning	Casual, dual-qualified where possible	4 massage and beauty, 2 nails, 2 hair
Afternoon therapists	4	Casual, paid for hours worked	Massage, beauty, nails, hair, cross-qualified with the morning pool
Reception	No separate role	Venue Manager covers the morning shift. Rostered afternoon staff cover check-in.	

Hiring priority. Therapists qualified in massage and in beauty or nails. One person can deliver either service in the same 30 or 45 minute slot and follow a testing client into an afternoon treatment, which keeps rostering adaptive and idle time low.

Awards: Hair and Beauty Industry Award (MA000005) and Health Professionals and Support Services Award (MA000027). Pay-rate clauses are to be confirmed with Fair Work. Superannuation is costed at 12% and workers compensation at 1.7%.

8.3 Morning roster by booked volume

Table 8.3: Roster by booked volume (25-minute cadence)

Booked	Phlebotomists	Therapists (massage and beauty / nails / hair)	Last first draw	Labour per morning	Revenue per morning	Contribution per morning
1	1	2 (1/1/0)	07:00	A$741.45	A$250	-A$491.45
2	1	4 (2/2/0)	07:25	A$1,248.39	A$500	-A$748.39
3	1	4 (2/2/0)	07:50	A$1,248.39	A$750	-A$498.39
4	1	4 (2/2/0)	08:15	A$1,248.39	A$1,000	-A$248.39
5	1	4 (2/2/0)	08:40	A$1,248.39	A$1,250	A$1.61
6	1	4 (2/2/0)	09:05	A$1,248.39	A$1,500	A$251.61
7	1	4 (2/2/0)	09:30	A$1,248.39	A$1,750	A$501.61
8	1	4 (2/2/0)	09:55	A$1,248.39	A$2,000	A$751.61
9	1	4 (2/2/0)	10:20	A$1,248.39	A$2,250	A$1,001.61
10	2	6 (3/2/1)	10:20	A$1,989.84	A$2,500	A$510.16
11	2	8 (4/2/2)	10:20	A$2,496.78	A$2,750	A$253.22
12	2	8 (4/2/2)	10:20	A$2,496.78	A$3,000	A$503.22
13	2	8 (4/2/2)	10:20	A$2,496.78	A$3,250	A$753.22
14	2	8 (4/2/2)	10:20	A$2,496.78	A$3,500	A$1,003.22
15	2	8 (4/2/2)	10:20	A$2,496.78	A$3,750	A$1,253.22
16	2	8 (4/2/2)	10:20	A$2,496.78	A$4,000	A$1,503.22
17	2	8 (4/2/2)	10:20	A$2,496.78	A$4,250	A$1,753.22
18	2	8 (4/2/2)	10:20	A$2,496.78	A$4,500	A$2,003.22

Weekday labour with superannuation and workers compensation; bookings assumed to fill from 07:00, one per slot first. Saturday labour is 1.5 times: at 9 bookings A$1,872.59, at 18 bookings A$3,745.18. The Venue Manager is a fixed cost and is not in these figures. A paid call-in of a second collector costs A$117.25 on a weekday and A$175.88 on a Saturday (three-hour minimum). Nine bookings earn more than ten to fourteen, because the tenth booking opens the second chair and steps the roster up. The target is eighteen every morning.

8.4 Hiring sequence

Recruitment documents are prepared. Hiring starts only after the laboratory agreement and venue are secured, then the Venue Manager first, then phlebotomists and treatment staff, then training and test runs. This compresses the hiring window once the gates clear (see Section 10).

8.5 Position register

Every position reports to the Venue Manager except GTT-01, who reports to the Founder (Anthony Zed). The employing entity is the operating company (Section 9.7), subject to accountant and solicitor advice.

Position number	Title	Employment type	Task and job description
GTT-01	Venue Manager (to be hired)	Full-time, Monday to Friday, 07:00 to 15:00 (salaried or casual to be confirmed)	Runs daily operations; rosters staff and checks Fair Work compliance; covers reception from 07:00 (an experienced rostered staff member covers Saturday); first aider, fire warden, EpiPen holder, escalation contact; liaises with the pathology partner; weekly profit and loss review

Position number	Title	Employment type	Task and job description
GTT-02	Phlebotomist, Collection Room 1	Casual (permanent part-time cannot be guaranteed on an adaptive roster; to be confirmed with Fair Work)	Rostered on every morning with a booking. Three timed blood draws per client (0, 60 and 120 minutes); glucose drink; specimen labelling and dispatch logs; first response to a faint; credentialed under the pathology partner
GTT-03	Phlebotomist, Collection Room 2	Casual	Rostered when ten or more clients are booked; otherwise the named on-call second collector for difficult draws and faints. Paid for hours worked when called in
GTT-04, GTT-05	Phlebotomist, relief	Casual, on call	As GTT-02; cover leave and absences, and act as the on-call second collector on lighter mornings
GTT-06 to GTT-09	Massage and Beauty Therapist (morning)	Casual	Pregnancy massage and pregnancy-safe facials in the 30 or 45 minute wellness window; Certificate IV; booking system check-in
GTT-10, GTT-11	Massage and Beauty Therapist, relief (morning)	Casual, on call	As GTT-06
GTT-12, GTT-13	Nail Technician (morning)	Casual	Manicure, pedicure and add-ons in the wellness window
GTT-14	Nail Technician, relief (morning)	Casual, on call	As GTT-12
GTT-15, GTT-16	Hairdresser (morning)	Casual	Blow-dry, styling, hair up in the wellness window
GTT-17	Hairdresser, relief (morning)	Casual, on call	As GTT-15
GTT-18	Massage Therapist (afternoon)	Casual	Stand-alone pre-booked massage and Refresh package; covers check-in and payment in booking gaps
GTT-19	Beauty Therapist (afternoon)	Casual	Stand-alone facials and Refresh package; as GTT-18
GTT-20	Nail Technician (afternoon)	Casual	Stand-alone nails and Restore package (nails half); as GTT-18
GTT-21	Hairdresser (afternoon)	Casual	Stand-alone hair and Restore package (hair half); as GTT-18

Weekly loading: at 18 a day there are 12 phlebotomist shifts a week over 4 people (3 shifts each); at 9 a day, 6 shifts a week (about 1.5 each). No standby allowance is assumed; any rate would be set by the award.

8.6 Saturday profitability

Saturday mornings earn their keep. At 18 clients: revenue 18 x A$250 = A$4,500. Staff at Saturday rates (1.5 times): 4 massage and beauty therapists A$1,350.00, 2 nail technicians A$662.58, 2 hairdressers A$662.58, 2 phlebotomists A$618.75 = A$3,293.91; plus 12% superannuation A$395.27 and 1.7% workers compensation A$56.00 = A$3,745.18. Contribution **+A$754.82 per Saturday** (about A$3,268 a month). The Venue Manager does not work Saturdays and rent is fixed, so this is extra profit. A Saturday covers its own staff from 8 clients with the 4-therapist roster (A$127; at 9 clients it earns A$377) and from 15 clients with the full roster (A$4.82). At 18 clients it earns A$754.82.

9. Financial Summary

Full statements are in the companion documents:

Document	Contents
Projected Profit and Loss (PDF)	Monthly and annual profit and loss
Cashflow Forecast (PDF)	Monthly cash, funding and GST timing
This business plan (PDF)	The complete plan

9.1 Steady state (from Month 1, 18 clients a day, A$8,000 rent assumption)

Line	A$ per month	A$ per year
Revenue	143,070.37	1,716,844.44
Payroll (including superannuation and workers compensation)	93,595.63	
Other costs (direct costs, rent budget A$8,000, insurance, administration)	14,288.34	
Total costs	**107,883.97**	1,294,607.64
Operating profit	**+35,186.40**	**+422,236.80**
Profit margin	about 24.6%	

Margin commentary. A 24.6% net operating margin (A$35,186 on A$143,070 of monthly revenue) is exceptional for a health-adjacent service business, and it holds with a break-even at under half of capacity.

9.2 Profit under different rent and tax cases

Case	Net per month	GST-stress net per month	Break-even (clients a day)	Peak funding	GST-stress Year 1
Base, A$8,000 rent	+A$35,186	+A$23,443	7.250	A$251,198	A$281,311
A$10,500 gross ceiling, all-in	+A$33,936	+A$22,306	7.440	A$256,198	A$267,675
A$10,500 plus separate utilities and cleaning (prudent)	+A$32,686	+A$21,170	7.630	A$256,198	A$254,038

What is GST-stress? GST-stress is the fully taxable case: the whole package is taxable, so one eleventh of every sale is paid away as GST. On the statute read, this is the legal base for GTT's own services (Section 9.6), not just a safety test. GTT still earns A$23,443 a month (A$281,311 over a first year at full capacity), against A$35,186 a month before GST. The GST-stress first-year net is A$254,038 to A$281,311 across the rent range of A$10,500 to A$8,000 a month. The break-even column assumes bookings fall one to a time slot; the GST-stress break-even is 8.138 at the base rent.

9.3 Year 1 at full capacity

Table 9.3: Year 1 net operating profit (no ramp-up)

A$	Per month	Year 1 (12 months)
Revenue	143,070.37	1,716,844.44
Total costs	107,883.97	1,294,607.64
Net operating profit	**35,186.40**	**422,236.80**
GST-stress net	23,442.58	281,310.96

Every month is a full-capacity month: 18 expecting mothers each morning, from Month 1. Earlier drafts showed a Year 1 profit of A$322,015 (A$196,609 under GST-stress). Those figures assumed four months of gradual build-up to full capacity. With a pre-launch waitlist filling the diary from the first day, there is no build-up, so Year 1 is simply twelve months at the steady-state profit and the earlier figures are replaced.

What is the A$422k a year steady state? At full capacity, 18 expecting mothers every morning, GTT earns A$35,186 a month in net operating profit. Twelve months of that is A$422,237 a year. Net margin is 24.6%.

The risk. This depends on the waitlist delivering a full morning on opening day. At 85% of capacity profit is about A$17,400 a month; at 70% GTT roughly breaks even; at half a morning (9 a day) GTT still earns about A$11,517 a month, because the roster scales down with the bookings, and pays back in Month 23.

9.4 Startup capital and funding

Item	A$
Pre-opening capital	251,198
Opening working capital reserve	85,000 (up to 110,000)
Startup capital, base	**336,198**
Startup capital at the A$10,500 rent cases	341,198
Peak funding actually drawn	251,198
Lowest cash point	85,000 at opening (the reserve is never drawn)
Funds on hand (founder savings, to be confirmed)	about 200,000
Gap on the peak-funding basis	about 51,198
Gap on the combined planning case (336,198 to 361,198)	about 136,198 to 161,198

Of the pre-opening capital, fit-out and construction is the largest group (A$139,678 in the base case). Month 1 already makes a profit, so the A$85,000 reserve is available for the larger floor area fit-out, cafe equipment and rent during fit-out, none of which is in the base. A quantity surveyor and builder quotes will confirm the startup budget. The accountant will advise on the funding route.

9.5 Sensitivities

Scenario	Net per month
Base (100% fill)	+A$35,186
85% fill	about +A$17.4k (payback Month 16 before GST timing)
70% fill	roughly break-even (-A$359)
50% fill (9 a day, roster scales down)	+A$11,517 (payback Month 23)
Medicare does not pay and GTT absorbs the A$25.85 laboratory fee	+A$22,935 (break-even 8.087)
10% post-test discount at 25% take-up, A$117 treatment	about A$1,386 less (cost shown separately, Table 5.3a)
Volume down 20%	+A$19,573
Morning price down 10% (A$225)	+A$20,879
Each A$10 per client of laboratory fee	about A$4,739 less at capacity

9.6 Tax, GST and structure

This is general information, not tax advice. Verify with a qualified adviser before acting.

GST treatment. GTT Center Perth's own services (wellness treatments, lounge access and refreshments) are taxable at 10% and the package prices of A$250 and A$300 include GST. The glucose tolerance test is a medical service provided and billed by the pathology partner, and is not part of GTT's invoice. GTT registers for GST before its first sale and claims input tax credits on its running costs and fit-out. The financial plan uses the fully taxable case as its base: at A$250 and 18 morning clients, net profit after GST is A$23,442.58 a month (A$281,310.96 in Year 1), compared with A$35,186.40 a month (A$422,236.80 in Year 1) before GST.

What the law says about phlebotomy. Section 38-10 of the GST Act lists the health services that are GST-free. It is a closed list of 21 services, and phlebotomy (blood collection) is not on it. The test is GST-free in the laboratory's hands because

Medicare pays a benefit for it (section 38-7), which is why the laboratory, not GTT, bills it. GTT supplies no GST-free service today, so the correct split of the package is nothing to a clinical part and the whole price taxable.

Table 9.6a: GST position (18 clients a morning, A$250 package)

Measure	Before GST (no GST line)	After GST (fully taxable base)
Net profit a month	A$35,186.40	A$23,442.58
Net profit Year 1 (no ramp-up)	A$422,236.80	A$281,310.96
GST on sales a month	not applicable	A$13,006.40
Input tax credits a month	not applicable	A$1,262.58
Net GST paid a month	not applicable	A$11,743.82

Table 9.6b: Value at stake if a genuine GST-free component existed (hypothetical, not available money)

Share of the A$250 package that would be a genuine GST-free service	Extra profit a month	Extra profit a year	Net profit a month
50% (50/50 split)	A$5,385.68	A$64,628.16	A$28,828.26
60% (60/40 split)	A$6,462.81	A$77,553.72	A$29,905.39
70% (70/30 split)	A$7,539.95	A$90,479.40	A$30,982.53

These rows show the size of the prize, not money GTT can claim. A 50% to 70% clinical share is not supportable: the laboratory's whole fee for the visit is A$25.85 (about 10% of A$250) and GTT's own collection cost is about A$30.73 a client (about 12%). Each percentage point of the package that were genuinely GST-free would be worth about A$108 a month. A split on invoices or a separate merchant account does not change the tax result, because GST follows the supply, not the bank account. Contrived splits are treated as avoidance under the anti-avoidance rule in Division 165 of the GST Act.

Lawful ways to improve the GST position, ranked by feasibility.

1. Keep every GTT supply taxable, register before the first sale and claim all input tax credits, including on fit-out and equipment (the legal base case above).
2. The laboratory places its own employed collectors in our rooms (Section 5.4). The collection stays GST-free in the laboratory's hands and GTT stops carrying collector wages. Any room or service fee GTT charges the laboratory is taxable.
3. Add real, separately priced services that are on the GST-free list, delivered by recognised professionals (for example nursing, dietetics, physiotherapy or psychology). Only those services are GST-free, and the rest of the package stays taxable.
4. The laboratory pays GTT a market fee for the room or the collection service. No fee has been quoted.
5. Once a real model is chosen, the accountant applies for an Australian Taxation Office private ruling on that one model. The Australian Taxation Office aims to finalise most private rulings within 28 days of receiving all information. Until a ruling is received, GTT prices and plans on the fully taxable basis.

Pathology fees. The glucose tolerance test is billed by the pathology partner to Medicare, and bulk billed for Medicare card holders, so GTT Center Perth carries no pathology cost or revenue on that test. The Medicare schedule fee is A$25.85 a visit; if Medicare did not pay, Table 5.4a shows the effect. We will obtain written fee schedules from PathWest, Western Diagnostic Pathology and Clinipath for private (non-Medicare) clients, consumables, courier and collection room terms, and negotiate wholesale per-test pricing on the basis of expected volume. No laboratory fee is included in the plan until confirmed in writing.

Proposed minimum tax. A proposed 30% minimum tax on discretionary trusts from 1 July 2028 is an exposure draft, not law. Accountant review is needed.

9.7 Business structure

This is general information. The structure is subject to advice from the company's accountant and solicitor before any lease or contract is signed.

GTT Center Perth will operate through a purpose-built Australian proprietary company. The company will hold the premises lease, the pathology partner agreement, employment contracts, insurance policies, GST and payroll registrations, and the business bank account. Its shares will be held by a family trust whose trustee is a separate corporate entity from the trustee

of the family's property trust, so that a claim against the venture cannot reach the family's property. The company will be managed by an employed Venue Manager and overseen by an independent director. The founder will take no operational role. The company will not rely on any other business of the founder or his associates.

Table 9.7: Structures considered

Option	What it means	View
1. Trade directly through an existing family trust	The venture's clinical and public liability sits beside the trust's other assets	Not recommended
2. A new dedicated proprietary company owned by a family trust	The company carries the lease, insurance, staff and clinical risk; the trust is the shareholder	**Recommended**
3. A completely separate new structure (new trust, new corporate trustee, new company)	The same protection with no link to any existing entity; more set-up cost	Strong alternative if option 2 is not possible under the existing trust documents
4. Hybrid or corporate-unit structures	Variations on the above, for example a unit trust or a joint venture company	Considered; no advantage over option 2 identified

Heading	Position
Risk containment	Clinical and public liability sits in the operating company, covered by its own public liability, professional indemnity and workers compensation insurance. The founder's other assets are held in separate entities and do not guarantee the venture.
Partners	The pathology partner is contracted by the operating company. Practitioners are employed by the operating company.
Status	Final structure to be confirmed with the company's accountant and solicitor before the lease and contracts are signed.

10. Risks and Mitigations

#	Risk	Level	Mitigation
1	No venue secured. Blocks hiring, fit-out and everything after.	Critical	Three conditional matches. Enquire with agents (with approval), inspect, search weekly.
2	No signed laboratory agreement. No fees quoted. Who employs the collectors, and so whether Medicare pays, is unresolved.	High	Written fee schedules from all three. Written answers from the laboratories, Services Australia and the Department of Health before fit-out spending (Section 5.4).
3	Funding gap. Planning need A$336k to A$361k against about A$200k on hand. Peak funding A$251,198.	High	Founder funding decision. Accountant. Staged fit-out.
4	Fill rate. Full capacity is assumed from day one. 85% fill gives about +A$17.4k a month and 70% roughly breaks even.	High	Pre-launch waitlist and marketing. Book 2 to 4 weeks ahead. Track fill weekly against an 85% warning line.
5	Cost model uses A$8,000 rent but budget is A$9,500 to A$10,500.	Medium	Net at the new rent is about +A$32,686 to +A$33,936 a month, shown beside the headline.
6	Courier arrangement unconfirmed.	Medium-High	Confirm one pickup a day in writing with the chosen laboratory.
7	Collection room approval and cost. Architect not engaged.	Medium	Brief an architect after the site is picked. Confirm requirements with the partner and the Department of Health.
8	Insurance not yet quoted, including the clinical line.	Medium-High	Obtain broker quotes before any commitment. Insurance is a launch gate.
9	Safety cover depends on one not-yet-hired Venue Manager.	Medium-High	Cross-train a backup responder. The venue does not open without this cover.
10	Referral law and the draft consent and privacy documents.	Medium	Solicitor review before any client or waitlist data is collected. No benefit to any referrer.
11	GST: phlebotomy is not on the closed list of GST-free health services, so no large GST-free share is available.	Medium	Plan on the fully taxable base of +A$23,443 a month. Accountant and, for any real GST-free service, a private ruling (Section 9.6).
12	Pregnancy complications on site (liability).	Medium	Risk protocol (Section 5.7), incident register, insurance.
13	Proposed 2028 minimum tax on discretionary trusts.	Low-Medium	Annual accountant review of the entity structure.
14	Hiring window compresses once the gates clear.	Medium	Job documents are pre-built so recruitment starts the day the gates clear.
15	Copycat entering Western Australia.	Low-Medium	First-mover position, referral relationships, brand, and a compliant collection room.
16	Medicare does not pay for specimens collected by GTT's own staff. If GTT absorbed the A$25.85 fee it would cost about A$12,251 a month (break-even 8.087); the alternative is a client-paid laboratory fee.	High	Prefer laboratory-employed collectors in our rooms; written confirmation from each laboratory and Services Australia before fit-out. Price needed to stay whole: A$275.85.
17	The business structure is not yet settled in advice.	Medium	Dedicated operating company with its own insurance; accountant and solicitor confirm before the lease is signed (Section 9.7).

Risks 1 to 3 are one single point of failure: no site and no laboratory partner means no revenue. The order of fixing matters more than anything else in this table.

11. Growth Roadmap and Launch Gates

No calendar dates are set. The venture holds launch undated until the gates clear.

11.1 Stages

Stage	What happens	Gate	Status
0	Venue search. Laboratory talks. Waitlist can start early.	none	In progress
Gate A	Laboratory agreement in place, with written terms and the collection approval and collector arrangement	Written terms	Open
Gate B	Venue confirmed, lease reviewed by a solicitor	Site and lease terms	Open
1	Venue Manager hire. Lease or heads of agreement. Architect and fit-out quotes.	A and B	Not started
2	Phlebotomist and treatment staff recruitment and contracts	Venue Manager in place	Not started
3	Partner site inspection, training, test runs, soft open for the waitlist, public launch	Fit-out done, staff hired	Not started
Go-live	First confirmed customer booking. The venture moves from standby to active.		Not started

11.2 Launch gate checklist

Gate	Condition	Status
G1	Signed laboratory agreement: fees, courier, term, collection approval, collector arrangement	Open
G2	Venue secured (257 to 290 sqm, 2 collection rooms or one large room with curtain, rent within A$9,500 to A$10,500) and lease reviewed	Open
G3	The laboratory signs off the room and credentials the collection staff	Not started
G4	Insurance bound, including the clinical line	Open
G5	Venue Manager hired (first aid, EpiPen, fire warden)	On hold
G6	Phlebotomists, relief pool and casual treatment pool hired	On hold
G7	Consent, privacy and referral-law advice cleared	Open
G8	First confirmed booking activates the venture	Not started
G9	Booking and waitlist system live: prepaid booking 2 to 4 weeks ahead, waitlist, roster published 1 to 2 weeks ahead	Not started
G10	Weekly fill-rate tracking against the 85% warning line	Not started

11.3 Decisions needed

#	Decision	Owner
1	Request written wholesale per-test and collection fees from all three laboratories, and ask whether they will place their own employed collectors in our rooms	Anthony, Reed
2	Approve agent enquiries for the shortlisted sites	Anthony
3	Decide how to cover the funding gap and brief the accountant on entity structure	Anthony
4	Appoint an architect once a site is chosen, using the concept floor plan	Anthony
5	Accountant: apply for the GST private ruling and confirm the invoice structure	Anthony
6	Confirm the terms of the 10% post-test discount (expiry, exclusions, test location)	Anthony
7	Build the booking and waitlist system and weekly fill tracking	Ivy
8	Approve the written questions to Services Australia and the Department of Health on the employee-or-contractor rule	Anthony
9	Confirm the business structure with the accountant and solicitor	Anthony

11.4 Growth options (not in the baseline)

Option	Status
Fill rate above plan, Package 2 upgrades, downtime fill	Upside, unproven
Postnatal offers in the afternoon (Section 7.9)	Idea only
After-hours workshops (Section 7.8)	Proposal
Third collection chair or room	Undecided

12. Appendix

Appendix A. Sources

Figures and facts in this plan come from the following, in plain terms.

- **GTT Center Perth financial model, version 0.6 (October 2026):** all financial figures, the profit and loss, the cashflow forecast and the roster costs.
- **GTT Center Perth operating documents:** clinical operations plan, commercial site brief, launch readiness tracker, staff profiles, service pricing and afternoon packages, marketing and referral plans.
- **Australian Bureau of Statistics,** Births, Australia 2024 and Data by region: abs.gov.au. The 2025 release is due on 6 November 2026.
- **Australian Institute of Health and Welfare,** gestational diabetes (2023-24), national hospital data.
- **Australasian Diabetes in Pregnancy Society,** consensus recommendations (2025) on gestational diabetes screening.
- **National Pathology Accreditation Advisory Council,** Guidelines for Approved Pathology Collection Centres (third edition, 2013).
- **Australian Taxation Office,** GST and health guidance and private rulings: ato.gov.au.
- **A New Tax System (Goods and Services Tax) Act 1999 (Cth),** sections 38-7 and 38-10 (compilation in force 1 January 2026), and **Health Insurance Act 1973 (Cth),** section 16A and Part IID (approved collection centres), read on legislation.gov.au. Medicare Benefits Schedule items 66548 and 73928 at mbsonline.gov.au.
- **Services Australia,** approved collection centre information for pathology.
- **Maternal and Infant Wellbeing Melbourne,** public website and directory listing: miwm.com.au.
- **Commercial property listings** viewed on 16 October 2026 at commercialrealestate.com.au (linked in Section 6.4).
- **Event organisers and professional bodies** named in Section 7.5.

External regulatory points in this plan are general information and must be verified with the relevant adviser or regulator (Western Australian Department of Health, the Australian Health Practitioner Regulation Agency where applicable, Fair Work, the Australian Taxation Office) before external reliance.

Appendix B. Items to Confirm

The authoritative index of open items. Status: BLOCKING (the venture cannot move past it), OPEN, IN PROGRESS, WAITING (on a third party), DATED (fixed date), NOT STARTED.

Blocking and dated items

Item	Owner	Blocking	Status
Venue location	Anthony	Lease, fit-out, hiring	Blocking
Rent: gross A$9,500 to A$10,500 a month confirmed	Anthony, agent	Lease	Open
Pathology partner fee and agreement	Anthony	Partner choice	Waiting on laboratories

H3	Price the second specimen fridge, second recovery recliner and possible second centrifuge	Grace, supplier quotes	OPEN

Ref	Item	Owner	Status
H4	Approve the list of items sensible to import direct and how to buy	Anthony	OPEN

Appendix C. Brand name shortlist and clearance status

Status. The venture trades under a working name, GTT Center Perth, and the business is not renamed by this plan. A final brand name has not been chosen, and no name has been registered, reserved or filed. The searches below were made on 17 October 2026 on public registers. They are a first-pass check and **not a trade mark clearance**. A registered trade marks attorney will clear the chosen name before any filing, signage or fit-out spend.

Table C1: Brand name comparison (public-register check, 17 October 2026)

Name	Domain availability (.com.au / .au)	Australian trade mark register (Class 44, health and wellness services)	Business-name use in Australia	Score out of 30	Assessment
BELMIRA	Available / available	No marks found	No exact match	23	Cleanest on public registers. Needs a spoken-name test and attorney clearance
ELOWEN	Held by another party / available	No Class 44 mark. Marks exist in other classes (baby furniture, wine, medical research)	About 12 active Australian users, one in Western Australia offering counselling for women	20	Strong meaning and fit. Needs attorney review of the Western Australian counselling business and the existing marks
SOLENA	Held / held	A registered Class 44 mark for health and clinic services (SOLENNE) sits one letter away; an exact SOLENA mark exists in cosmetics	Four skin and beauty businesses and companies in other states	18	Higher risk. Proceed only if the attorney clears it
ELOWYN	Held / held (by a Queensland accounting company)	No marks found, but it sounds identical to ELOWEN	Three active users	17	Not recommended. It carries the same questions as ELOWEN, with weaker domains and a spelling difficulty

The score is a comparison on six plain criteria, out of 30. It is a judgement aid, not a legal finding.

Meaning. ELOWEN is a Cornish name meaning "elm tree", a symbol of strength and new beginnings. ELOWYN is a modern respelling of the same name. BELMIRA is a Portuguese and Spanish given name, read as "beautiful view".

Update, October 2026. Earlier work had SOLENA leading. A registered Class 44 mark one letter from SOLENA was found, and both SOLENA domains are held, so SOLENA no longer leads.

Next steps. (1) A spoken-name test with ten people. (2) A formal search and written opinion from a registered trade marks attorney across Classes 44, 41 and 3. (3) If supported, filing with IP Australia, where current fees are A$250 per class using the standard descriptions or A$400 per class with custom wording (IP Australia, October 2026). (4) Securing the matching domain once the owning entity is confirmed. A business name search with the corporate regulator and social media handle checks are still to be done by hand.

Appendix D. Corporate structure recommendation

GTT Center Perth is recommended to trade through a new dedicated proprietary limited company, so that the clinical and public liability of a venue serving pregnant women is held in one clean legal entity, with the lease, pathology agreement, staff and insurance all in its name. The options considered and the reasons are in Section 9.7. The final structure and share holding will be confirmed by our accountant and solicitor before the lease is signed.
